QUALITY BY CONVICTION: A LOOK BEHIND THE SCENES

For us, premium quality means personally overseeing every step—from the selection of raw materials to the finished capsule.”

Markus Bauer, Founder & CEO

FloraSan is built on a clear promise: the highest purity, maximum bioavailability, and complete transparency. As the founders and marketing directors, we personally verify the strict hygiene and quality standards during regular on-site visits to the production facilities.

We make no compromises when it comes to your health. We combine the best of nature with state-of-the-art manufacturing standards—controlled, lab-tested, and safe.

- ✓ **Highest raw material quality:** Carefully selected, pure ingredients.
- ✓ **Certified production:** Manufactured to the strictest standards.
- ✓ **Guaranteed excellence:** Every batch strictly monitored to meet the highest industry benchmarks.

FloraSan – Natural. Pure. Consistent.

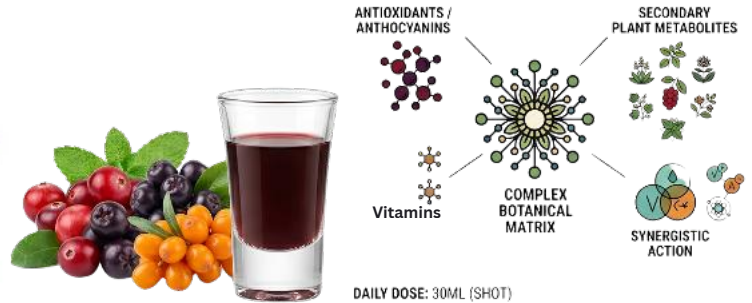

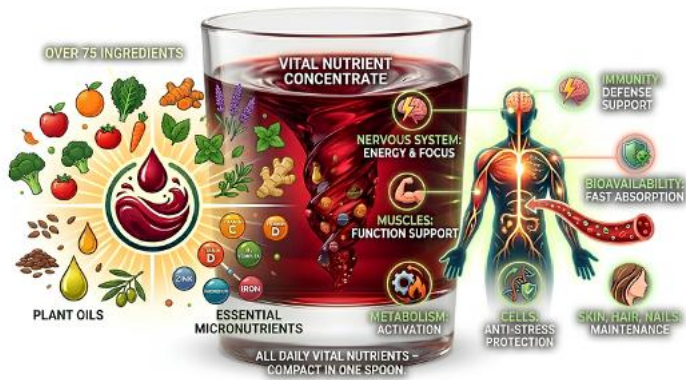

DAILY SACHETS

FloraSan stands for scientifically backed premium nutrients. Nine innovative multi-component formulas combine highly bioavailable branded ingredients and phytosomes in perfectly balanced daily sachets—for your health at the cellular level.

VITAL MUSHROOM EXTRACTS

FloraSan offers high-potency extracts of Hericium, Cordyceps, Lion's Mane, Shiitake, Reishi, Chaga, Turkey Tail, Tremella and Maitake—for maximum bioavailability, natural balance, and holistic vitality in everyday life.

TOP SELLER

MICRONUTRIENT CONCENTRATE

This nutrient concentrate combines over 75 natural ingredients—fruits, vegetables, herbs, and oils—with essential micronutrients. What makes it special is that its liquid form ensures extremely high bioavailability, allowing the body to absorb this concentrated matrix of nutrients optimally and directly.

ORGANIC FUNCTIONAL JUICES

FloraSan offers cold-pressed organic juices, functional herbal drinks, and mild children’s juices in glass bottles. The recipes preserve the complex matrix of pigments, tannins, and valuable phytochemicals (such as anthocyanins). No added sugar—for pure, functional plant power.

Your Vision, Our Formulation

Custom Product Development & Manufacturing

From custom formulations to market-ready premium products. We develop and manufacture dietary supplements and functional beverages tailored exactly to your specifications—direct from the manufacturer, certified, and uncompromisingly pure.

1. Concept & Consulting

Share your product target audience, and desired effect with us. We check feasibility and advise you on market trends and raw materials.

2. Custom Formulation

Our lab develops a tailored formula. Whether maximum bioavailability (liposomal), based (vegan), or with specific taste profiles - we fine-tune until it's perfect.

3. Compliance & Quality

We ensure **marketability**. All products are tested and documented according to the strictest standards (IFS, GMP, Organic Certification).

4. Manufacturing & Bottling

Capsules, Daily Packs, Mouth Sprays, or farm-fresh direct juices - we fill using modern facilities.

5. Design & Packaging

You receive the finished product, fully filled and, on request, with your individual FloraSan label or your own brand design.

Flexibility in batch sizes: Attractive solutions for both rapid time-to-market and high-volume production.

- Capsules from 1,000 units
- Juices from 500 bottles

1. Sun-Ripened Organic Fruits

Quality begins in harmony with nature. Our fruits ripen under optimal conditions in pristine environments until they reach their full density of natural active ingredients. This slow, natural growth is crucial for developing a complex profile of phytochemicals and vitamins.

2. Gentle Harvesting

Timing is everything. We harvest at the exact moment when the concentration of vital substances reaches its peak. Careful handling of the plants ensures that the delicate structure of the berries is preserved and no oxidation occurs before processing begins.

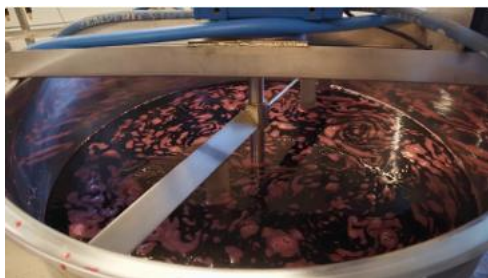

3. Hand-Picked Selection

Maximum purity through manual care: Every batch is inspected by hand. Only flawless fruits that meet our strict quality criteria are selected for juice extraction. This meticulous selection process guarantees an end product of maximum biological integrity.

4. Cold-Pressed

To protect valuable enzymes and vitamins, we rely on consistent cold-pressing technology. Unlike industrial processes, we avoid heat during this step. This preserves the original cellular structure of the juice, allowing the bioactive components of the fruit to maintain their full potency.

5. Gentle Pasteurization

Safety without compromising nutritional value: We preserve our juices through brief and particularly gentle heating. This process is optimized to keep thermal stress to a minimum, ensuring that the natural aroma and heat-sensitive vital substances are best preserved.

6. Bottling in Glass

We bottle exclusively in glass to preserve purity and taste. This non-reactive packaging ensures our juices retain their natural health-promoting properties until the very first sip.

Our Raw Materials Philosophy (The Source of Excellence)

UNCOMPROMISING PURITY – FROM SOURCE TO FINISHED PRODUCT

For us, quality is not a matter of chance, but the result of a seamless process. At FloraSan, this process begins right at the source—with the selection of our global and regional raw material partners.

Verified Bioavailability:

We consistently rely on scientifically validated branded raw materials, liposomal structures, and phytosomes. This guarantees that the valuable ingredients reach your customers' cells at maximum density, with verifiable results.

Strict “Clean Label” Principle:

Our products are pure natural power. We consistently avoid unnecessary anti-caking agents (such as magnesium stearate), artificial colors, synthetic flavors, or hidden allergens. What is listed on the label is 100% contained in the capsule or bottle.

Gentle processing:

Whether it's heat-free cold pressing for our organic fresh juices or gentle extraction methods for our high-dose medicinal mushrooms—the biological integrity and complex matrix of the plant compounds are fully preserved.

Certified Safety & Laboratory Testing

CERTIFIED PRECISION FROM GERMANY

Trust is good, but maximum control is our standard. Every single batch is monitored in accordance with the strictest pharmaceutical and food safety guidelines.

Certified production to the highest standards:

Our products are manufactured using seamless production processes and are certified to the world's leading industry standards:

- **IFS Food (International Featured Standards):** Ensuring the highest levels of safety and quality in food processing.
- **GMP (Good Manufacturing Practice):** Guarantees compliance with the strictest pharmaceutical manufacturing guidelines.
- **EU Organic Regulation:** Government-certified organic quality for our entire range of juices and beverages.

Independent laboratory tests (batch testing):

Every batch of raw materials is subjected to microbiological analysis by independent, accredited German laboratories prior to processing, and every finished product is tested in the same manner prior to shipment. We conduct comprehensive testing for:

- Heavy metals (lead, cadmium, mercury)
- Pesticides and herbicides
- Microbiological purity (mold, salmonella)

Legal certainty & EFSA compliance:

With FloraSan, you take no risks. All formulations are fully marketable within the EU, thoroughly documented, and precisely tailored to meet the EFSA's strict health claims requirements.

"Our company headquarters in the picturesque Rhön, surrounded by untouched nature, symbolizes our commitment to quality and purity. We combine the best from around the world in our products to bring you only the best. Trust our German-made food supplements, which combine global raw materials with the precision and care of German manufacturing."
