High-Performance Nutraceuticals

The Cellular Vanguard – The Evolution of Cellular Synergy.

FloraSan fundamentally redefines the boundaries of modern supplementation by bridging the gap between evolutionary biology and cutting-edge biochemistry. Our entire portfolio is engineered around one core principle: delivering maximal biological efficacy through synergistically aligned nutrient networks. Instead of relying on isolated single ingredients, we focus on holo-synergistic complexes that directly interface with cellular homeostasis to sustain the body on a systemic level. Every single formula is scientifically validated and crafted to the strictest clean-label standards—entirely free from artificial additives, low-grade carriers, or chemical preservatives to guarantee an absolutely pure and unadulterated daily performance.

The technological vanguard of FloraSan lies in the development of sophisticated, tailor-made galenic delivery systems engineered to bypass traditional physiological absorption barriers. Whether deploying perfectly portioned multi-item sachets with liposomal softgels, advanced epigenetic cell complexes, medicinal mushrooms precisely disrupted via temperature-controlled hot-water extraction, or liquid drops, sprays, and shots designed for direct sublingual absorption—we maximize bioavailability at the molecular level. These high-performance delivery methods ensure that sensitive bioactive compounds clear gastrointestinal bottlenecks without degradation, arriving at their cellular targets with peak kinetic velocity

Premium Multi-Item Daily Sachets

The evolution of cellular synergy. Our sachets synchronize advanced delivery systems in one pack. From liposomal softgels to capsules—engineered for maximum nutrient density and targeted release. An uncompromisingly pure matrix matching strict clean-label standards, perfectly portioned for daily life.

Cellular Longevity & Epigenetics

The evolution of cellular longevity. Our capsules synchronize high-purity adaptogens and epigenetic compounds for systemic homeostasis. Engineered for maximum nutrient density and targeted release to shield cellular structures from oxidative stress—uncompromisingly pure matching strict clean-label standards.

Organic medicinal mushrooms

The evolution of fungal cell regulation. Our capsules deliver precise hot-water disruption of the chitin cell wall. High-molecular-weight beta-glucans, triterpenes, and biopolymers become maximally bioavailable. A pure cellular shield matching strict clean-label standards.

Drops and Sprays

The evolution of direct cellular absorption. Our drops and sprays bypass gastrointestinal barriers through high-precision, sublingual absorption. Pure, holo-synergistic liquid matrices guarantee maximum stability and nutrient availability—uncompromisingly clean and engineered for daily life.

Premium Shots

The evolution of direct absorption. Our fluid shots deliver accelerated, sublingual uptake that bypasses digestive bottlenecks. Holo-synergistic solubility ensures complex bioactives remain highly stable within a homogenous matrix—uncompromisingly pure matching strict clean-label standards.

Premium Multi-Item Daily Sachets

Science-Backed Nutraceuticals – The Evolution of Cellular Synergy

Next-Level Galenics: Maximum Purity, Zero Compromises

At FloraSan, we redefine quality: nature optimized by modern science. Our Daily Sachets break traditional boundaries by synchronizing advanced delivery systems within a single daily pack—ranging from liposomal softgels for optimized nutrient density to gastro-resistant capsules for targeted release. What we leave out is just as vital as what we put in: zero unnecessary fillers, no artificial flow agents, no cheap carriers. The result is an uncompromisingly pure nutrient matrix of maximum biological integrity (clean-label standard), perfectly portioned for your demanding lifestyle.

The Heritage of Traditional Plant Medicine

We bridge the gap between ancient ethnobotanical wisdom and the latest insights from micronutrient science. To us, highly standardized botanical extracts and endogenous co-factors are not isolated compounds, but essential components to support overall vitality and functional balance. Our product development is driven by smart, targeted synergy: every component is selected and dosed to interact harmoniously on a physiological level. This creates a bioactive cascade designed to provide scientifically backed support for your holistic well-being from within.*

Our Three Core Pillars of Innovation

Three fundamental principles make every single daily pack a functional powerhouse:

- **Maximized Bioavailability:** Whether utilizing patented phytosome structures, liposomal capsules, or organic bisglycinate compounds—we deploy pioneering technologies to ensure key ingredients bypass the gastric barrier intact, reach the cellular level directly, and are optimally utilized by the organism.
- **Biochemical Network Synergy:** Isolated vitamins are a thing of the past. Our formulations reflect nature's complex networks. We weave vitamins, minerals, bioactive enzymes, and highly documented branded botanical extracts together, ensuring they lock into your body's biochemical pathways like high-precision gears.
- **Advanced Cellular Support:** The exceptional concentration of standardized polyphenols, carotenoids, and master antioxidants in our sachets is the core feature. They act as an advanced cellular shield to trigger the body's natural defense mechanisms and sustain your cellular vitality at peak level over the long term.

GUT HEALTH & DIGESTION DAILY SACHET

Gut health & Digestion

Ingredients:

1. Acid-Base & Enzyme Cofactors Capsule: Magnesium malate, capsule shell (hydroxypropyl methylcellulose), L-alanyl-L-glutamine (Sustamine®), reduced L-glutathione (Setria®), lipid-standardized vitamin C (PureWay-C®), zinc bisglycinate, potassium citrate, potassium bicarbonate, manganese bisglycinate, pyridoxal-5-phosphate, sodium molybdate.

2. Probiotic Capsule: Lactoferrin (milk), gastro-resistant capsule shell (hydroxypropyl methylcellulose, gelling agent: gellan gum / DRcaps®), acacia fiber (OptiFibre®), chicory inulin (Orafiti®), multi-strain bacterial mixture (contains L. acidophilus NCFM®, B. longum BB536®, L. rhamnosus GG®, L. plantarum 299v®, riboflavin-5-phosphate).

3. Gastro-Resistant Enzyme Capsule: Gastro-resistant capsule shell (hydroxypropyl methylcellulose / VCAPS® Enteric), multi-enzyme complex (DigeZyme®: amylase, protease, lactase, lipase, cellulase), bromelain, papain, lipase, lactase, serrapeptase, alpha-galactosidase.

4. Botanical Motility Capsule: Ginger root extract (Ginfort®), artichoke leaf extract (Cynamed®), peppermint oil powder, capsule shell (hydroxypropyl methylcellulose), fennel seed extract, dandelion root extract.

5. Gut Barrier Support Capsule: Bovine colostrum (milk / Intact®), quercetin phospholipid complex (Quercetifit®), tributyrin powder (CoreBiome®), zinc L-carnosine (PepZin GI®), capsule shell (hydroxypropyl methylcellulose).

1. Acid-Base & Enzyme (VCAPS®)

nutritional values	1 capsule	NRV%*
Potassium (from Potassium Citrate & Potassium Bicarbonate)	250 mg	4
Magnesium (elemental from Magnesium Malate, Albion® TRAACS)	150 mg	40
L-Glutamine (as Sustamine®)	250 mg	--
L-Glutathione Reduced (Setria®)	150 mg	188
Vitamin C (from PureWay-C®)	33 mg	330
Zinc (as Zinc Bisglycinate, Albion® TRAACS)	5 mg	357
Vitamin B6 (as Pyridoxal-5-Phosphate / P-5-P)	2 mg	100
Manganese Molybdenum	50 µg	100

2. Probiotic (Gastro-Resistant, Lonza DRcaps®)

nutritional values	1 capsule	NRV%*
Multi-Strain Probiotic Blend (15 Strains)	25-50 Billion	--
Lactoferrin (Lacprodan®)	CFU	--
Acacia Fiber (OptiFibre®)	200 mg	--
Inulin (Orafiti®)	100 mg	--
Vitamin B2 (as Riboflavin-5-Phosphate)	50 mg	--
	1,4 mg	100

3. Gastro-Resistant Enzyme (VCAPS®)

nutritional values	1 capsule	NRV%*
DigeZyme® Enzyme Blend (Amylase, Protease, Lactase, Lipase, Cellulase)	350 mg	--
Bromelain (1,200 GDU/g)	180 mg	--
Papain (>6,000 TU/mg)	100 mg	--
Lipase (explicit > 5,000 FIP)	40 mg	--
Lactase (20,000 FCC)	30 mg	--
Serrapeptase (>10,000 SPU/mg)	10 mg	--
Alpha-Galactosidase (600 GalU)	8 mg	--

4. Botanical Motility (Hard Gel) (VCAPS®)

nutritional values	1 capsule	NRV%*
Ginger Root Extract (5% Gingerols, Ginfort®)	300 mg	--
Artichoke Extract (2.5% Cynarin, Cynamed® INDENA)	200 mg	--
Peppermint Oil Powder (oil-filled, Colpermin style)	100 mg	--
Fennel Seed Extract 10:1 (> 5% Anethole, Euromed®)	50 mg	--
Dandelion Root Extract (> 5% Bitter Compounds, Euromed®)	50 mg	--

5. Gut Barrier Support (Tablet)

nutritional values	1 capsule	NRV%*
Quercetin Phytosome (Quercetifit®)	250 mg	--
Colostrum (40% IgG standardized, Intact®)	350 mg	--
Tributyrin (as CoreBiome®)	150 mg	--
Zinc Carnosine (PepZin GI®)	75 mg	170

Character & Synergy

This high-end formulation represents the pinnacle of modern gastrointestinal supplementation. Developed as a holistic multi-item system, it combines ultra-pure bacterial cultures, bioactive enzymes, and standardized botanical extracts into a perfectly synchronized matrix. Each component has been selected to leverage physiological synergies, offering demanding users an uncompromising, premium solution to support overall well-being from within.

Craftsmanship & Technology

Premium raw material quality meets pioneering galenics. The formulation utilizes innovative, gastro-resistant capsules (DRcaps®/VCAPS®) to shield and deliver sensitive cultures and enzymes directly to the digestive tract. Combined with highly concentrated premium extracts of ginger, artichoke, and fennel, alongside an exclusive colostrum complex, this product stands for maximum purity. Free from unnecessary additives, manufactured to the highest quality standards for optimized nutrient utilization.

Health & Nutritional Science

Our premium formula is built on scientifically validated nutrient synergies, specifically targeted to support key functions of the organism:

- **Maintenance of the Intestinal Mucosa:** The included Riboflavin (Vitamin B2) is scientifically proven to contribute to the maintenance of normal mucous membranes, thereby supporting the integrity and function of the sensitive intestinal barrier.
- **Physiological Digestion & Motility:** High-quality botanical extracts from artichoke and dandelion support normal digestion and natural gastrointestinal motility. Fennel and ginger further contribute to the normal function of the digestive tract.
- **Efficient Acid-Base Metabolism:** The targeted inclusion of Zinc provides a scientifically confirmed contribution to a normal acid-base metabolism, as well as normal carbohydrate and fatty acid metabolism.
- **Immunological Balance:** Since a major part of the immune system is located in the gut, Zinc and Vitamin C contribute to the normal function of the immune system, while premium colostrum rounds off the formulation with natural immunoglobulins (IgG).
- **High-Level Cellular Protection:** The advanced antioxidant matrix of Vitamin C, Zinc, and Manganese contributes significantly to protecting cells from oxidative stress, supporting cellular defense and regeneration.

Healthy Aging & Cardiovascular

HEALTHY AGING & CARDIOVASCULAR DAILY SACHET

Ingredients:

1. Omega-3 Premium Softgel: Fish oil concentrate (or algae oil / krill oil Superba Krill®), capsule shell (bovine gelatin, humectant: glycerin), D-alpha-tocopherol (Vitamin E).

2. Vascular Shield Capsule: Capsule shell (hydroxypropyl methylcellulose), trans-resveratrol (Veri-te™), pine bark extract (Pycnogenol®), quercetin phospholipid complex (Quercelit®), nattokinase fermentation extract (NSK-SD®), pyridoxal-5-phosphate, black pepper extract (BioPerine®), riboflavin-5-phosphate, L-methylfolate, methylcobalamin.

3. Cardio Cell-Power Softgel: Glycine propionyl-L-carnitine hydrochloride (GlycoCarn®), capsule shell (bovine gelatin, humectant: glycerin), coenzyme Q10 (ubiquinol Kaneka®), tomato oleoresin (lycopene Lycored®), tocotrienol/tocopherol complex (Tocomin® SupraBio).

4. Magnesium Capsule: Magnesium bisglycinate, capsule shell (hydroxypropyl methylcellulose), anti-caking agent (magnesium salts of fatty acids).

5. Calcification Guard Tablet: Firming agent (microcrystalline cellulose), cholecalciferol (Vitamin D3), menaquinone-7 (Vitamin K2), anti-caking agents (silicon dioxide, magnesium salts of fatty acids).

1. Omega-3 Premium (Soft Gel)

nutritional values	1 capsule	NRV%*
Fish Oil Concentrate (TG) 1000 mg		--
Vitamin E (as D-alpha-tocopherol)	5,1 mg	42

2. Vascular Shield (Hard Gel)

nutritional values	1 capsule	NRV%*
Trans-Resveratrol (Veri-te™)	100 mg	--
Pine Bark Extract (95% OPC, Pycnogenol®)	100 mg	--
Quercetin Phytosome (Quercelit®)	100 mg	--
Nattokinase (NSK-SD®)	200 mg	--
Vitamin B6 (as Pyridoxal-5-Phosphate / P-5-P)	4,2 mg	300
Folate (Vitamin B9, as 5-MTHF Methylfolate)	600 µg	300
Vitamin B12 (as Methylcobalamin)	500 µg	20000
Riboflavin (Vitamin B2, as Riboflavin-5-Phosphate)	1,4 mg	100
Black Pepper Extract (BioPerine® / Piperine)	10 mg	--

3. Cardio Cell-Power (Soft Gel)

nutritional values	1 capsule	NRV%*
Coenzyme Q10 (as Ubiquinol Kaneka®)	150 mg	--
Glycine Propionyl-L-Carnitine (GlycoCarn®)	500 mg	--
Mixed Tocopherols (Tocomin® SupraBio)	15 mg	125
Lycopene (from Tomato, Lycored®)	10 mg	--

4. Magnesium Capsule (Hard Gel)

nutritional values	1 capsule	NRV%*
Magnesium (as Magnesium Bisglycinate)	125 mg	33

5. Calcification Guard (Tablet)

nutritional values	1 tablet	NRV%*
Vitamin K2 (all-trans MK-7)	100 µg	133
Vitamin D3	100 µg / 4,000 IU	2000

Healthy Aging & Cardiovascular

Character & Synergy

This pioneering premium formulation has been specifically engineered to meet the sophisticated demands of overall vitality and cardiovascular health. As a scientifically validated multi-item system, it unites essential fatty acids, high-tier botanical extracts, and synergistic co-factors within a perfectly synchronized daily sachet. Each component has been purposefully selected to provide targeted nutritional support for heart function and protection against oxidative stress.

Craftsmanship & Technology

Uncompromising raw material quality dedicated to longevity. The formulation combines ultra-pure, stable omega-3 concentrate with standardized premium extracts, such as trans-resveratrol (Veri-te™) and pine bark (Pycnogenol®). By utilizing advanced delivery systems—ranging from liquid softgels for fat-soluble nutrients to precisely dosed capsules—it guarantees optimized nutrient utilization and stability for these sensitive compounds. Manufactured to the highest quality standards and entirely free from unnecessary additives.

Health & Nutritional Science

Our cell-active formula leverages the scientifically documented synergies of elite branded ingredients and essential co-factors:

- **Vascular & Tissue Defense with Pycnogenol® & Veri-te™:** At the core of this formulation is the potent combination of original French maritime pine bark extract (Pycnogenol®) and pure trans-resveratrol (Veri-te™). These highly standardized polyphenols are at the forefront of longevity and vascular integrity research. This protective matrix is reinforced by Riboflavin (Vitamin B2), which is scientifically proven to contribute to the protection of cells from oxidative stress.
- **Cardiovascular Synergy & Heart Function:** The pairing of ultra-pure omega-3 concentrate (rich in EPA/DHA) and premium Coenzyme Q10 (as bioavailable Ubiquinol from KanekaH) supports physiological pathways. Simultaneously, the marine fatty acids EPA and DHA deliver a scientifically confirmed contribution to maintaining normal heart function.
- **Enzymatic Dynamics via Nattokinase:** Featuring patented NSK-SD®, each sachet provides a premium, fermentation-derived nattokinase. Synergistically combined with Vitamins B6 and B12—which contribute to normal red blood cell formation and a balanced homocysteine metabolism—this complex offers targeted nutritional support for vascular health.
- **The Calcium Utilization Axis (D3 & K2):** To ensure precise nutrient routing, the formula integrates high-strength Vitamin D3 with bioactive Vitamin K2 (as all-trans MK-7). While Vitamin D3 supports normal blood calcium levels, both micronutrients actively contribute to the maintenance of normal bones.
- **Cellular Energy & Mitochondrial Support:** The advanced matrix is completed by cell-active compounds including L-Carnitine (GlycoCarn®) and Lycopene (Lycored®). Working alongside Vitamins B2, B6, and B12, they provide a validated contribution to a normal energy-yielding metabolism and the reduction of tiredness and fatigue.

FloraSan

Metabolism & Weight Control

METABOLISM & WEIGHT CONTROL DAILY SACHET

Ingredients:

1. Thermo-Master Capsule: Green tea extract, green coffee bean extract, capsule shell (hydroxypropyl methylcellulose), caffeine anhydrous, ginger root extract, Coleus forskohlii extract (forskolin), Citrus aurantium extract (synephrine), grains of paradise seed extract (Paradoxine®), brown seaweed extract (fucoxanthin), cayenne pepper extract (capsaicin), black pepper extract (piperine).

2. Metabolic-Control Capsule: Berberine HCl, Ceylon cinnamon bark extract, R-alpha lipoic acid, zinc bisglycinate, capsule shell (hydroxypropyl methylcellulose), inositol, bitter melon fruit extract, cholecalciferol (Vitamin D3), menaquinone-7 (Vitamin K2), chromium picolinate, D-biotin.

3. ALCAR-Push Tablet: Acetyl-L-carnitine hydrochloride, L-alpha-glycerolphosphorylcholine (Alpha-GPC), firming agent (microcrystalline cellulose), L-carnitine tartrate, ubiquinol coenzyme Q10, anti-caking agents (silicon dioxide, magnesium salts of fatty acids), coating agents (hydroxypropyl methylcellulose, glycerin).

4. Appetite-Kill Capsule: Garcinia cambogia extract, Caralluma fimbriata extract, capsule shell (hydroxypropyl methylcellulose), 5-hydroxytryptophan (5-HTP), Gymnema sylvestre extract, saffron stigma extract (Satiereal®), pyridoxal-5-phosphate (Vitamin B6).

1. Thermo-Master (Hard Gel)	
nutritional values	1 capsule NRV%*
Grains of Paradise Seed Extract (as Paradoxine®)	40 mg --
Green Tea Extract (98% EGCG)	250 mg --
Caffeine Anhydrous	100 mg --
Ginger Root Extract	75 mg --
Fucoxanthin	5 mg --
Green Coffee Bean Extract (50% CGA)	200 mg --
Synephrine	40 mg --
Forskolin	50 mg --
Capsaicin	5 mg --
Black Pepper Extract (Piperine)	5 mg --
2. Metabolic-Control (Hard Gel)	
nutritional values	1 capsule NRV%*
Berberine HC	300 mg --
R-Alpha Lipoic Acid	120 mg --
Ceylon Cinnamon Extract	180 mg --
Bitter Melon Extract 10:1	50 mg --
Inositol	100 mg --
Zinc (as Zinc Bisglycinate)	15 mg 150
Biotin (Vitamin B7)	150 µg 300
Chromium (as Chromium Picolinate)	200 µg 500
Vitamin D3 (as Quali®-D)	50 µg / 2,000 IU 1000
Vitamin K2 (as MK-7)	100 µg 133

3. ALCAR-Push (Tablet Oblong)	
nutritional values	1 tablet NRV%*
Acetyl-L-Carnitine (ALCAR)	1000 mg --
L-Carnitine Tartrate	200 mg --
Alpha-GPC	400 mg --
Ubiquinol Coenzyme Q10	100 mg --

4. Appetite-Kill (Hard Gel)	
nutritional values	1 capsule NRV%*
Garcinia Cambogia Extract (60% HCA)	300 mg --
Gymnema Sylvestre Extract (25% Gymnemic Acids)	100 mg --
Caralluma Fimbriata Extract	180 mg --
Saffron Extract (as Satiereal®)	90 mg --
5-HTP (from Griffonia simplicifolia)	100 mg --
Vitamin B6 (as Pyridoxal-5-Phosphate / P-5-P)	2 mg 142

Metabolism & Weight Control

Character & Synergy

This high-end sachet was engineered as a holistic multi-item system to support metabolic pathways and weight management goals.* At a scientifically validated premium level, the advanced matrix unites thermogenic botanical extracts, metabolic regulators, and ultra-pure co-factors within a perfectly synchronized daily pack. An uncompromising all-in-one solution for demanding individuals looking to support their body's natural physiological processes with precise, targeted nutrient synergies.

Craftsmanship & Technology

Advanced nutritive-dynamics driven by uncompromising raw material quality. The sachet utilizes distinct delivery systems—ranging from precisely dosed hard capsules to oblong tablets—ensuring optimal stability and the targeted release of sensitive compounds. Featuring elite branded ingredients such as Paradoxine® and Satiereal®, this formulation guarantees controlled purity and strictly standardized active-contents. Free from unnecessary additives and manufactured to the highest quality criteria.

Health & Nutritional Science

Our cell-active formula leverages the documented synergies of premium key ingredients and essential micronutrients to target core metabolic pathways:

- **Macronutrient & Blood Glucose Regulation:** High-strength Chromium provides a scientifically confirmed contribution to normal macronutrient metabolism (carbohydrates, fats, proteins) and aids in maintaining normal blood glucose levels. This metabolic axis is functionally reinforced by premium extracts of Berberine, Ceylon Cinnamon, Bitter Melon, and Gymnema Sylvestre, which are traditionally used to help manage metabolic balance.
- **Botanical Activity (Thermo-Master):** The innovative combination of patented Grains of Paradise (Paradoxine®), Green Tea extract (rich in EGCG), Green Coffee Bean extract, and Capsaicin offers traditional plant-based support for the metabolism. Ginger and Black Pepper extract (Piperine) functionally optimize the formula's bioavailability.
- **Metabolic Energy & ALCAR-Push:** The pairing of Acetyl-L-Carnitine (ALCAR), L-Carnitine Tartrate, and Coenzyme Q10 complements the micronutrient base. Working in synergy with Biotin (Vitamin B7) and Vitamin B6, they deliver a validated contribution to a normal energy-yielding metabolism. Vitamin B6 further supports normal protein and glycogen metabolism.
- **Nutritional Well-being & Satiereal®:** Featuring patented Saffron extract (Satiereal®), each sachet provides a highly researched, premium botanical dedicated to holistic dietary well-being. This specialized matrix is rounded out with functional extracts of Garcinia Cambogia (HCA), Caralluma Fimbriata, and 5-HTP to traditionally support dietary lifestyle goals.
- **Fatty Acid Metabolism & Immune Support:** Zinc contributes provenly to normal fatty acid and carbohydrate metabolism, as well as normal protein synthesis. Combined with Vitamin D3 (as premium Quali®-D) and Vitamin K2 (MK-7), the complex comprehensively supports the normal function of the immune system and the maintenance of bone integrity.

FloraSan

Stress Balance & Regeneration

Stress Balance & Regeneration

Character & Synergy

This high-end sachet was engineered as a holistic multi-item system to effectively support the body and mind. At a scientifically validated premium level, the matrix unites potent botanical adaptogens, neuronal co-factors, and essential micronutrients within a perfectly synchronized daily pack. An uncompromising all-in-one solution for demanding individuals seeking to support cognitive function, maintain inner balance, and aid natural regenerative processes.

Craftsmanship & Technology

Advanced nutritive balance driven by uncompromising raw material quality. The sachet utilizes distinct delivery systems—ranging from stomach-friendly hard capsules to precisely compressed tablets—ensuring optimal stability and the targeted release of sensitive compounds. Featuring elite branded ingredients such as KSM-66® and Quali®-D, this formulation guarantees controlled purity and strictly standardized active contents. Free from unnecessary additives and manufactured to the highest quality criteria.

STRESS BALANCE & REGENERATION DAILY SACHET

Ingredients:

1. Magnesium Capsule: Magnesium malate, magnesium bisglycinate (Albion™), capsule shell (hydroxypropyl methylcellulose), anti-caking agent (magnesium salts of fatty acids).

2. B-Complex Active Capsule: Nicotinamide, calcium D-pantothenate, capsule shell (hydroxypropyl methylcellulose), riboflavin-5-phosphate, pyridoxal-5-phosphate, thiamine hydrochloride, L-methylfolate, D-biotin, methylcobalamin.

3. Adaptogen Capsule: Ashwagandha root extract (KSM-66®), Rhodiola rosea extract, L-theanine, capsule shell (hydroxypropyl methylcellulose), soy lecithin (phosphatidylserine), calcium D-pantothenate, black pepper extract (piperine).

4. Protection Tablet: Calcium-L-ascorbate (buffered Vitamin C), N-acetyl-cysteine, firming agent (microcrystalline cellulose), zinc bisglycinate, alpha-lipoic acid (R-ALA), manganese bisglycinate, L-selenomethionine, cholecalciferol (Vitamin D3), anti-caking agents (silicon dioxide, magnesium salts of fatty acids), menaquinone-7 (Vitamin K2), coating agents (hydroxypropyl methylcellulose, glycerin).

Health & Nutritional Science

Health & Nutritional Science Our cell-active formula leverages the documented synergies of premium key ingredients and essential micronutrients to support normal neurological and psychological functions:

- **Mental Resilience & Botanical Support (KSM-66® & Rhodiola):** At the core of this formulation is the synergistic pairing of patented Ashwagandha extract (KSM-66®) and highly standardized Rhodiola Rosea extract, which are traditionally valued for helping the body adapt to emotional stress. These botanical extracts are complemented by the amino acid L-Theanine and Phosphatidylserine (PS) to round off this targeted wellness blend.
- **Nervous System & Psychological Support:** A comprehensive, bioactive Vitamin B complex (including B1, B2, B3, B5, B6, B12, Biotin, and Folate), working in perfect synergy with highly bioavailable Magnesium Bisglycinate, provides a scientifically confirmed contribution to the normal functioning of the nervous system and normal psychological function.
- **Reduction of Tiredness & Fatigue:** Pantothenic Acid (Vitamin B5) contributes provenly to normal mental performance. Working alongside Vitamins B2, B6, B12, Vitamin C, and Magnesium, it actively aids in the reduction of tiredness and fatigue—a cornerstone for sustainable regeneration.
- **Cellular Protection & Immune Defense:** The advanced antioxidant matrix consisting of buffered Vitamin C, Zinc, Selenium, and Manganese contributes significantly to protecting cells from oxidative stress. Simultaneously, Zinc, Selenium, Vitamin C, and Vitamin D3 (as premium Quali®-D) comprehensively support

FloraSan

Mobility & Bone Strength

Mobility & Bone Strength

Character & Synergy

This high-end sachet was engineered as a holistic multi-item system specifically tailored to meet the complex structural demands of the musculoskeletal system. The scientifically validated matrix unites innovative collagen structures, highly concentrated botanical extracts, and essential joint building blocks within a perfectly synchronized daily pack. An uncompromising all-in-one solution designed to support active lifestyles, joint function, and bone strength.*

Craftsmanship & Technology

Advanced tissue dynamics driven by uncompromising raw material quality. The sachet utilizes distinct delivery systems—ranging from liquid softgels for marine fatty acids to highly concentrated capsules and tablets—ensuring optimal stability and the targeted release of sensitive compounds. Featuring elite branded ingredients such as UC-II®, ApresFlex®, and OptiMSM®, this formulation guarantees controlled purity, superior bioavailability, and strictly standardized active contents. Free from unnecessary additives and manufactured to the highest quality criteria.

MOBILITY & BONE STRENGTH DAILY SACHET

Ingredients:

1. Joint Capsule: Indian frankincense extract (ApresFlex®), hyaluronic acid complex (Hyal-Joint®), capsule shell (hydroxypropyl methylcellulose), hydrolyzed collagen (Peptan®), lipid-standardized vitamin C (PureWay-C®): L-ascorbic acid, fatty acids, citrus bioflavonoids, chicken cartilage powder (UC-II®), manganese bisglycinate, copper bisglycinate, lecithin (phosphatidylcholine), sodium borate.

2. Regeneration Caplet: Methylsulfonylmethane (OptiMSM®), lipid-standardized vitamin C (PureWay-C®), L-proline, firming agent (microcrystalline cellulose), choline-stabilized orthosilicic acid (BioSil®), anti-caking agents (silicon dioxide, magnesium salts of fatty acids), sodium molybdate.

3. Magnesium Capsule: Magnesium bisglycinate, capsule shell (hydroxypropyl methylcellulose), anti-caking agent (magnesium salts of fatty acids).

4. Bone Tablet: Calcium carbonate, calcium citrate, firming agent (microcrystalline cellulose), zinc bisglycinate, zinc oxide, strontium citrate, menaquinone-7 (Vitamin K2), cholecalciferol (Vitamin D3), anti-caking agents (silicon dioxide, magnesium salts of fatty acids), coating agents (hydroxypropyl methylcellulose, glycerin).

5. Omega-3 + E Softgel: Fish oil concentrate (or algae oil), capsule shell (gelatin, humectant: glycerin), D-alpha-tocopherol (Vitamin E), astaxanthin oleoresin.

1. Joint Capsule (Hard Gel)

Health & Nutritional Science

Our cell-active formula leverages the documented synergies of premium key ingredients and essential micronutrients to support the maintenance of bones, cartilage, and connective tissues:

- Collagen & Cartilage Matrix (UC-II®, Peptan® IIm & Hyal-joint®):** At the core of this formulation is the advanced pairing of undenatured type II collagen (UC-II®), hydrolyzed collagen peptides (Peptan® IIm), and premium hyaluronic acid (Hyal-joint®). To support these structural components, the matrix includes Vitamin C (as PureWay-C®), which provides a scientifically confirmed contribution to normal collagen formation for the normal function of cartilage and bones.
- Botanical Support & Joint Comfort (ApresFlex® & OptiMSM®):** Featuring patented Boswellia serrata extract (ApresFlex®) and ultra-pure MSM (OptiMSM®), each sachet provides highly researched premium compounds traditionally valued in musculoskeletal formulations. This complex is functionally completed by L-Proline, Silicon (ExaSil®), and Molybdenum to provide comprehensive nutritional integration.
- Bone Structure & Mineralization (D3, K2 & Calcium):** Precise nutrient routing is driven by the synergistic trio of Calcium, high-strength Vitamin D3, and bioactive Vitamin K2 (all-trans MK-7). Calcium is needed for the maintenance of normal bones, while Vitamins D3 and K2 actively contribute to the maintenance of normal bones. Vitamin D3 further supports normal absorption and utilization of calcium.
- Connective Tissue Support & Elasticity:** Manganese contributes provenly to the normal formation of connective tissue, while Copper aids in the maintenance of normal connective tissue. These essential trace elements work hand in hand with traditionally utilized trace amounts of Boron and Strontium to round off the structural micronutrient matrix.
- Cellular Defense & Antioxidant Shield:** The advanced antioxidant matrix consisting of Vitamin C, Vitamin E, Zinc, Manganese, and Copper contributes significantly to protecting cells from oxidative stress. Premium omega-3 fish oil concentrate (TG) and natural Astaxanthin round off the daily pack with high-quality fatty acids and carotenoids.

FloraSan

Focus & Mental Energy

FOCUS & MENTAL ENERGY DAILY SACHET

Ingredients:

1. B-Complex Active Capsule: Nicotinamide, calcium D-pantothenate, capsule shell (hydroxypropyl methylcellulose), riboflavin, pyridoxal-5-phosphate, thiamine hydrochloride, methylcobalamin, L-methylfolate, D-biotin.

2. Magtein Capsule: Capsule Magnesium-L-Threonate, capsule shell (hydroxypropyl methylcellulose), anti-caking agent (magnesium salts of fatty acids).

3. Focus Capsule: Citicoline, Bacopa monnieri extract, L-theanine, capsule shell (hydroxypropyl methylcellulose), Rhodiola rosea extract, zinc bisglycinate, whole coffee fruit extract (NeuroFactor™), black pepper extract (piperine), kelp extract (iodine source).

4. Dopamine / Drive Tablet: L-tyrosine, Mucuna pruriens extract, theacrine, firming agent (microcrystalline cellulose), pyridoxine hydrochloride (Vitamin B6), anti-caking agents (silicon dioxide, magnesium salts of fatty acids), coating agents (hydroxypropyl methylcellulose, glazing agent).

1. B-Complex Active (Hard Gel)

nutritional values	1 capsule	NRV%*
Vitamin B1 (Thiamine)	3,3 mg	300

Focus & Mental Energy

Character & Synergy

This high-end sachet was engineered as a holistic multi-item system to support cognitive function, focus, and mental energy. At a scientifically validated premium level, the advanced matrix unites clinically researched botanical extracts, neuronal co-factors, and targeted amino acids within a perfectly synchronized daily pack. An uncompromising all-in-one solution for demanding individuals, high-performers, and creatives looking to support mental clarity, learning capacity, and stress resilience.

Craftsmanship & Technology

Advanced cognitive dynamics driven by uncompromising raw material quality: The sachet utilizes distinct delivery systems—ranging from precisely dosed hard capsules to targeted tablet forms—ensuring optimal stability and the optimized utilization of sensitive compounds. Featuring elite branded ingredients such as NeuroFactor™ and Magtein®, this formulation guarantees controlled purity, exceptional tissue penetration, and strictly standardized active contents. Free from unnecessary additives and manufactured to the highest quality criteria.

Health & Nutritional Science

Our cell-active formula leverages the documented synergies of premium key ingredients and essential micronutrients to support normal neurological and cognitive functions:

- **Mental Performance & Neurotransmitter Axis:** Pantothenic Acid (Vitamin B5) provides a scientifically confirmed contribution to normal mental performance and to the normal synthesis and metabolism of steroid hormones, Vitamin D, and some neurotransmitters. To complement this cognitive axis, the matrix integrates amino acid L-Tyrosine, Mucuna Pruriens extract (standardized to L-Dopa), and Theacrine (Dopamine Drive).
- **Cognitive Focus & Neuro-Support (NeuroFactor™ & Bacopa):** At the core of this formulation is the patented whole coffee fruit extract (NeuroFactor™) working in perfect synergy with highly standardized Bacopa Monnieri extract (min. 45% bacosides) and pure Citicoline. These botanical key ingredients are traditionally valued for helping to maintain mental focus and supporting overall cognitive well-being.
- **Nervous System & Magtein®:** Each sachet delivers the exclusive, highly bioavailable magnesium form Magnesium L-Threonate (Magtein®). Magnesium contributes provenly to the normal functioning of the nervous system and normal psychological function. This is paired with L-Theanine from green tea and Rhodiola Rosea extract for traditional nutritional stress management.
- **Energy Delivery & Mental Clarity:** A comprehensive, bioactive Vitamin B complex (including B1, B2, B3, B6, B12, Biotin, and Folate) supports a normal energy-yielding metabolism and actively aids in the reduction of tiredness and fatigue—vital for maintaining prolonged mental stamina.
- **Cellular Protection & Cognitive Co-Factors:** Zinc contributes to normal cognitive function and, alongside Riboflavin (Vitamin B2), provides protection of cells from oxidative stress. Furthermore, natural Iodine sourced from Kelp extract supports normal thyroid function and the normal production of thyroid hormones.

Beauty Anti-Ox Glow

Beauty & Anti-Ox Glow

Character & Flavor

This high-end sachet was engineered as a holistic multi-item system to optimize cellular protection, skin elasticity, and a radiant complexion at a scientifically validated premium level. The advanced matrix unites potent cell-active antioxidants, essential structural proteins, and moisture-binding co-factors within a perfectly synchronized daily pack. An uncompromising all-in-one solution for demanding individuals looking to effectively revitalize natural beauty, skin architecture, and connective tissues from within.

Craftsmanship & Technology

Advanced nutricosmetics driven by uncompromising raw material quality: The sachet utilizes distinct delivery systems—ranging from lipid softgels for essential fatty acids to precisely dosed hard capsules—ensuring optimal stability and the superior bioavailability of sensitive compounds. Featuring elite branded ingredients such as Ester-C® and Almega PL®, this formulation guarantees controlled purity, exceptional tissue absorption, and strictly standardized active contents. Free from unnecessary additives and manufactured to the highest quality criteria.

BEAUTY & ANTI-OX GLOW DAILY SACHET

1. Glow Capsule: Capsule shell (hydroxypropyl methylcellulose), hyaluronic acid (low molecular weight), zinc bisglycinate, tomato oleoresin (lycopene), marigold extract (lutein), astaxanthin oleoresin, beta-carotene (Vitamin A source), L-selenomethionine, manganese bisglycinate, copper bisglycinate, zeaxanthin.

2. Lipid Softgel: GLA-concentrated oil, sea buckthorn fruit oil, algae oil (Almega PL™), capsule shell (bovine gelatin, humectant: glycerin), ubiquinol coenzyme Q10, tocotrienols, lecithin (phosphatidylcholine).

3. OPC Capsule: Calcium ascorbate/threonine complex (Ester-C®), capsule shell (hydroxypropyl methylcellulose), grape seed extract (OPC), Masson pine bark extract, S-acetyl-L-glutathione, hydrolyzed collagen (Type I/III), L-proline, L-lysine HCl, hyaluronic acid (high molecular weight).

4. Biotin-Silicate Capsule: L-cystine, saw palmetto extract, L-methionine, bamboo extract (silica source), methylsulfonylmethane (MSM), capsule shell (hydroxypropyl methylcellulose), calcium D-pantothenate (Vitamin B5), anti-caking agent (magnesium salts of fatty acids).

1. Glow Capsule (Hard Gel)

Health & Nutritional Science

Our cell-active formula leverages the documented synergies of premium key ingredients and essential micronutrients to precisely target skin integrity, hair health, and advanced antioxidant pathways:

- **Collagen Synthesis & Skin Architecture (Ester-C® & Hyaluronic Acid):** Patented, stomach-friendly Vitamin C (as Ester-C®) provides a scientifically confirmed contribution to normal collagen formation for the normal function of skin. To complement this functional effect, the matrix integrates low-molecular-weight Hyaluronic Acid, Collagen Peptides (Type I & III), and the essential amino acids L-Proline, L-Lysine, and L-Methionine.
- **Advanced Cellular Defense & Antioxidant Shield (SAG & OPC):** The high-tier combination of S-Acetyl-L-Glutathione (SAG), Grape Seed extract (OPC), and Pine Bark extract provides a premium botanical matrix. Concurrently, Vitamin C, Zinc, Manganese, Copper, and Selenium contribute significantly to protecting cells from oxidative stress—a cornerstone in comprehensive cellular protection.
- **Maintenance of Skin, Hair & Nails:** Highly bioavailable Zinc and Selenium contribute provenly to the maintenance of normal hair and nails, while Zinc and Vitamin A (sourced from natural Beta-Carotene) aid in the maintenance of normal skin. Additionally, Copper provides a validated contribution to normal skin and hair pigmentation.
- **Cellular Lipids & Moisture Balance (Almega PL® & Q10):** Exclusive algal oil (Almega PL®) delivers essential fatty acids to provide high-quality lipids alongside Coenzyme Q10 (Ubiquinol), Phosphatidylcholine, and Tocotrienols to round off this advanced nutritional blend.
- **Connective Tissue Support & Botanical Matrix:** Manganese contributes to the normal formation of connective tissue, while Copper aids in the maintenance of normal connective tissue. Bioactive MSM and silicon-rich Bamboo extract traditionally complement this structural matrix, while Lycopene, Lutein, and Astaxanthin functionally complete the advanced carotenoid network.

Immune Protection & Cellular Power

Ingredients:

1. Vit. C Depot Capsule: Liposomal Vitamin C Complex (PureWay C®: L-ascorbic acid, phospholipids, plant fatty acids, citrus bioflavonoids), capsule shell (hydroxypropyl methylcellulose), citrus bioflavonoids extract.

2. Cell Protection Capsule: N-acetyl-L-cysteine (NAC), L-histidine, capsule shell (hydroxypropyl methylcellulose), Quercetin-Phytosome (Quercetin®: quercetin from Sophora japonica L., lecithin), zinc bisglycinate, pyridoxal-5-phosphate (P5P), copper bisglycinate, L-selenomethionine, sodium selenite.

3. D3 + K2 Softgel: Olive oil (or sunflower oil as carrier), gelatin (bovine or vegan capsule shell), astaxanthin, vitamin K2 (menaquinone-7, MK-7 all-trans), vitamin D3 (cholecalciferol).

4. Plant-Extract Tablet: Curcuma-Phytosome (turmeric extract, lecithin), Green Tea Extract (Greenselect Phytosome®), Broccoli sprout extract (Broccophane®), Resveratrol-Phytosome (trans-resveratrol, lecithin), Quercetin-Phytosome (Quercetin®), firming agent (microcrystalline cellulose), coating agents (depending on flavor: lemon or ginger essential oil, glazing agents), anti-caking agents (magnesium salts of fatty acids, silicon dioxide).

Immune Protection & Cellular Power

Character & Synergy

This high-end sachet was engineered as a holistic multi-item system to support immune defense and normal cellular energy production. The advanced matrix unites highly bioavailable vitamins, cell-active phytosomes, and essential amino acids within a perfectly synchronized daily pack. An uncompromising all-in-one solution for demanding individuals looking to reinforce their natural immune shield and enhance mitochondrial dynamics from within.

Craftsmanship & Technology

Advanced cellular defense driven by uncompromising raw material quality. The sachet utilizes distinct delivery systems—ranging from liposomal capsules to a highly concentrated botanical matrix tablet—ensuring maximum stability and superior bioavailability. By implementing patented phytosome technologies (such as Quercetin® and Veri-te™), sensitive botanical compounds are embedded into a phospholipid matrix, optimizing nutrient absorption within the organism. Free from unnecessary additives and manufactured to the highest quality criteria.

Health & Nutritional Science

Our cell-active formula leverages the documented synergies of premium key ingredients and essential micronutrients to precisely target immune and cellular pathways:

- **Liposomal Immune Activation (PureWay-C® & Vit. D3):** Advanced liposomal Vitamin C (as PureWay-C®), working in perfect synergy with high-strength Vitamin D3 and Zinc Bisglycinate, provides a scientifically confirmed contribution to the normal function of the immune system. Natural citrus bioflavonoids functionally support the stability of the vitamin C complex.
- **Advanced Cellular Defense & Phytosome Matrix (Quercetin® & Veri-te™):** The high-tier combination of Quercetin Phytosome (Quercetin®), Resveratrol Phytosome (Veri-te™), and Curcuma Phytosome delivers a highly researched botanical matrix. Concurrently, Vitamin C, Zinc, Selenium, and Copper contribute significantly to protecting cells from oxidative stress.
- **Mitochondrial Energy & Cellular Power:** Vitamin B6 (as bioactive P-5-P) contributes proactively to a normal energy-yielding metabolism and the reduction of tiredness and fatigue. The cellular matrix is further complemented by premium botanical extracts of broccoli sprouts (Broccophane®, standardized to sulforaphane) and green tea (Greenselect Phytosome®).
- **Glutathione Axis & Amino Acid Support:** N-Acetyl-L-Cysteine (L-Cysteine NAC) and L-Histidine traditionally complement this advanced formulation. Additionally, Zinc delivers a validated contribution to normal DNA synthesis, normal protein synthesis, and the protection of cells from oxidative stress.
- **Vascular & Tissue Integrity:** Copper contributes to the maintenance of normal connective tissue and supports normal iron transport in the body. The advanced formula is rounded out with bioactive Vitamin K2 (all-trans MK-7) and natural Astaxanthin to nutritionally support the overall ingredient network.

Cellular Longevity & Epigenetics

Beyond Aging – Cellular Optimization & Epigenetic Reprogramming

Epigenetic Precision: The Future of Healthy Aging

Aging is a biological process that can be supported through targeted nutrition at the cellular level. At FloraSan, we develop next-generation nutraceuticals designed to complement the body's natural mechanisms of cellular protection. Our formulations focus on botanical ingredients widely researched in the field of epigenetic regulation—the ability to positively support gene expression through targeted bioactive impulses without altering the underlying DNA sequence. We combine highly researched sirtuin activators, cellular energy co-factors, and senolytic botanicals into ultra-pure synergies engineered to support long-term physiological well-being.

The Heritage of Traditional Plant Medicine

Our development is anchored in the latest breakthroughs of modern nutritional science. We view the cell as a dynamic system whose vitality can be supported by protecting cells from oxidative stress and maintaining efficient energy pathways. Instead of relying on isolated compounds, we deploy molecular networks: highly standardized polyphenols, bioactive co-factors, and patented botanical extracts are precisely dosed to synergistically complement vital cellular systems. This is intelligent, high-end nutrition designed for ultimate demands.

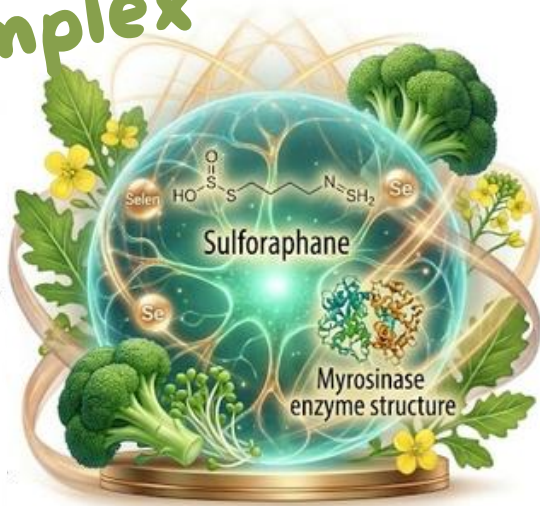

Our Three Pillars of Longevity Innovation

Three fundamental principles define the functional excellence of this cell-active category:

- **Activation of Cellular Energy (Mitochondrial Support):** We integrate pioneering key ingredients designed to complement mitochondrial environments and cellular energy production. By providing targeted nutritional reinforcement alongside essential micronutrients that contribute to a normal energy-yielding metabolism, cellular well-being is sustainably supported.*
- **Botanical Modulation & Sirtuin Matrix:** Utilizing ultra-pure, standardized secondary plant compounds, we target the matrix of so-called "longevity genes" (sirtuins). These bioactive networks are designed to complement natural cellular protective mechanisms and contribute to the protection of cells from oxidative stress.*
- **Advanced Support & Cellular Clearance:** Our formulations implement highly researched botanical components to support cellular autophagy—the body's endogenous recycling and cleanup process. By nutritionally assisting cells in regeneration and clearing oxidative burdens, normal tissue function is maintained.

FloraSan

Sulforaphane Complex

SULFORAPHANE KOMPLEX CELLULAR LONGEVITY & EPIGENETICS

Ingredients: Broccoli seed extract (Brassica oleracea var. italica, contains 10% Sulforaphane), Mustard seed extract (Sinapis alba, active Myrosinase enzyme), Sodium selenite (Selenium), Hydroxypropylmethylcellulose (Capsule Shell)

Nutritional value	1 capsule	NRV
Broccoli Seed Extract	400 mg	--
- thereof Sulforaphane	40 mg	--
Mustard Seed Extract (Myrosinase)	50 mg	--
Selenium	55 µg	100

Sulforaphane Komplex

Character & Synergy

This next-generation nutraceutical represents the vanguard of modern cellular nutritional science. At the core of its bioactive matrix is Sulforaphane—a heavily researched isothiocyanate recognized in geroscience as one of the most potent natural compounds studied for its unique cellular interactions. Through this innovative multi-component design, the complex provides demanding individuals and biohackers with a highly efficient botanical blend to support overall cellular well-being and antioxidant protection.*

Craftsmanship & Technology

The secret to optimized nutrient delivery lies within advanced enzymatic activation. Since isolated sulforaphane is inherently unstable, our sophisticated formulation pairs highly standardized broccoli seed extract directly with a specific mustard seed extract. This specialized extract supplies the native enzyme Myrosinase, which acts as a biochemical catalyst designed to support the conversion and availability of active sulforaphane within the formula. Encapsulated in pure plant-based cellulose, laboratory-tested, and uncompromisingly free from synthetic additives or fillers.

Health & Nutritional Science

Our cell-active formula leverages the documented synergies of highly standardized plant compounds and essential trace elements to target core cellular pathways:

- **Enzymatically Activated Sulforaphane:** Each capsule delivers 40 mg of bioactive Sulforaphane, with its stability and activation flawlessly driven by the integrated Myrosinase enzyme structure (sourced from mustard seed extract). This advanced botanical complex is at the forefront of modern research regarding secondary plant metabolites.
- **Advanced Defense Against Oxidative Stress:** The included Selenium (as sodium selenite for precise utilization) provides a scientifically confirmed contribution to protecting cells from oxidative stress. This represents a fundamental mechanism to support long-term cellular well-being.
- **Immunological Integrity:** Selenium contributes provenly to the normal function of the immune system, thereby supporting the body's natural defenses.
- **Thyroid & Metabolic Interface:** This essential trace element delivers a validated contribution to normal thyroid function, embedding it seamlessly into the body's overarching metabolic functions.
- **Structural Vitality:** Selenium actively contributes to the maintenance of normal hair and normal nails, comprehensively underlining the structural and cellular benefits of this premium formulation.

FloraSan

Magtein Complex

MAGTEIN COMPLEX CELLULAR LONGEVITY & EPIGENETICS

Ingredients: Magnesium-L-threonate (Magtein®), Lion's Mane mushroom extract (Hericium erinaceus, 30% Polysaccharides), Calcium-D-pantothenate (Vitamin B5), Hydroxypropylmethylcellulose (Capsule Shell)

Nutritional value	3 capsules	NRV
Magtein® Magnesium-L-Threonate	1500 mg	--
- thereof elemental Magnesium	108 mg	29
Lion's Mane Extract	500 mg	--
Vitamin B5	6 mg	100

Magtein Complex

Character & Synergy

This innovative nutraceutical represents the vanguard of modern cellular and cognitive nutritional science. At the core of its bioactive matrix is the combination of advanced micronutrients and functional co-factors. We strategically pair the groundbreaking magnesium compound Magtein® with highly standardized mushroom polysaccharides. This complex provides demanding individuals and biohackers with a highly efficient nutritional blend to support cognitive performance, normal nervous system function, and mental well-being.

Craftsmanship & Technology

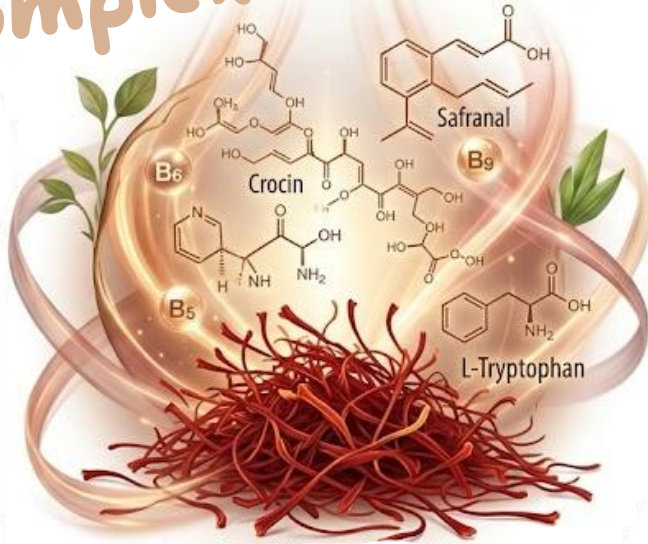

The foundation of this premium formulation relies on optimizing nutrient delivery. While conventional magnesium compounds possess limited transport efficiency into certain tissues, Magtein® (Magnesium L-Threonate) was specially engineered for superior cellular utilization and exceptional bioavailability. Coupled with a gently processed Lion's Mane extract and encapsulated in pure plant-based cellulose, this product delivers uncompromising purity, maximum bioavailability, and zero synthetic additives.

Health & Nutritional Science

Our cell-active formula leverages the documented synergies of advanced key ingredients and essential co-factors to target core neurological and cognitive pathways:

- **Mental Performance & Neurotransmitter Synthesis:** The included Vitamin B5 (Pantothenic Acid) provides a scientifically confirmed contribution to normal mental performance. Furthermore, it actively supports the normal synthesis and metabolism of steroid hormones, Vitamin D, and some neurotransmitters.
- **Advanced Nervous System Support:** Exclusive Magnesium L-Threonate (Magtein®) delivers highly bioavailable elemental magnesium, which contributes provenly to the normal functioning of the nervous system—a cornerstone for sustaining neurological well-being.
- **Psychological Function & Mental Balance:** Magnesium contributes directly to normal psychological function, supporting the organism in maintaining overall mental balance and normal cognitive processes under demanding conditions.
- **Energy Metabolism & Fatigue Reduction:** Both Magnesium and Vitamin B5 provide a validated contribution to a normal energy-yielding metabolism and actively aid in the reduction of tiredness and fatigue—vital for maintaining long-term cellular and mental energy.
- **Standardized Lion's Mane Matrix:** Providing 500 mg of Lion's Mane extract (standardized to 30% polysaccharides) per daily dose, the formula delivers highly researched, bioactive mushroom structures that are traditionally valued for complementing targeted wellness lifestyles.

Saffron Complex

SAFFRON COMPLEX CELLULAR LONGEVITY & EPIGENETICS

Ingredients: L-Tryptophan, Saffron extract (Crocus sativus, contains 2% Safranal and 3% Crocins), Pyridoxine hydrochloride (Vitamin B6), Pteroylmonoglutamic acid (Vitamin B9 / Folic Acid), Hydroxypropylmethylcellulose (Capsule Shell)

Nutritional value	1 capsule	NRV
L-Tryptophan	250 mg	--
Saffron Extract	30 mg	--
Vitamin B6	1,4 mg	100
Folic Acid (Vitamin B9)	200 µg	100

Saffron Complex

Character & Synergy

This advanced nutraceutical represents the perfect synergy of modern nutritional science and emotional well-being. At the core of its bioactive matrix is the combination of selected micronutrients and functional botanical extracts. By combining a highly standardized saffron extract with essential amino acids and bioactive co-factors, this complex provides demanding individuals and biohackers with a high-precision tool to support normal psychological function and the normal functioning of the nervous system.

Craftsmanship & Technogy

The foundation of this premium formulation relies on the exact molecular standardization of its bioactive marker compounds. Our saffron extract is obtained through a gentle, sophisticated process that guarantees a defined ratio of the heavily researched key components Safranal and Crocin. Paired with ultra-pure L-Tryptophan and enclosed in a plant-based cellulose capsule, this product stands for uncompromising purity. Manufactured to the highest quality criteria, laboratory-tested, and completely free from synthetic additives or fillers.

Health & Nutritional Science

Our cell-active formula leverages the documented synergies of premium key ingredients and essential micronutrients to support normal neurological and psychological pathways:

- **Highly Standardized Saffron Matrix:** Each capsule delivers 30 mg of Saffron extract, strictly standardized to 2% Safranal and 2% Crocin. These bioactive secondary plant compounds are at the forefront of modern research regarding botanicals traditionally valued for supporting emotional balance.
- **Advanced Support via L-Tryptophan:** Featuring 250 mg of L-Tryptophan, the formulation supplies an essential amino acid precursor to complement the targeted nutritional matrix within this premium complex.
- **Regulation of Hormonal Activity:** The included Vitamin B6 provides a scientifically confirmed contribution to the regulation of hormonal activity—a crucial intersection for overarching metabolic and neuronal balance.
- **Nervous System & Psychological Function:** Vitamin B6 contributes provenly to the normal functioning of the nervous system and normal psychological function, thereby supporting mental balance and emotional well-being.
- **Cell Division & Energy Delivery:** Both Vitamin B6 and Folic Acid (Vitamin B9) contribute significantly to a normal energy-yielding metabolism and aid in the reduction of tiredness and fatigue. Furthermore, Folic Acid plays a scientifically validated, essential role in the process of cell division.

FloraSan

KSM-66 Aswaghandha Complex

KSM-66 ASWAGHANDA COMPLEX CELLULAR LONGEVITY & EPIGENETICS

Ingredients: Ashwagandha root extract (KSM-66®), Rhodiola rosea extract, Calcium-D-pantothenate (Vitamin B5), Hydroxypropylmethylcellulose (Capsule Shell).

Nutritional value	1 capsule	NRV
Ashwagandha Extract	300 mg	--
– thereof Withanolides	15 mg	--
Rhodiola Rosea Extract	200 mg	--
Vitamin B5	6 mg	100

KSM-66 Aswaghandha Complex

Character & Synergy

This top-tier nutraceutical represents the ultimate fusion of traditional ethnobotanical wisdom and modern longevity research. At the core of its bioactive matrix is the principle of adaptogenic resilience—the body's capacity to balance biological stressors. By strategically pairing the proprietary premium extract KSM-66® with highly standardized Rhodiola Rosea, this complex provides demanding individuals and biohackers with profound nutritional support to support cognitive function, mental well-being, and overall vitality.*

Craftsmanship & Technology

The foundation of this premium product relies on the uncompromising preservation of the plant's natural active profile at maximum biochemical density. The patented extraction process of KSM-66® is built upon the principles of "Green Chemistry," delivering a highly concentrated, full-spectrum root extract without utilizing alcohol or synthetic solvents. Paired with pure Rhodiola Rosea extract and enclosed in a plant-based cellulose capsule, this formulation guarantees immaculate purity, optimized nutrient utilization, and zero artificial additives or fillers.

Health & Nutritional Science

Our cell-active formula leverages the documented synergies of premium key ingredients and essential micronutrients to support mental performance and energy pathways:

- **Premium Full-Spectrum Extract KSM-66®:** Each capsule delivers 300 mg of the patented Ashwagandha root extract, strictly standardized to provide 15 mg of Withanolides. This elite raw material is globally recognized in clinical research for its role as a traditional botanical to support emotional balance and help the body adapt to temporary stress.
- **Optimization of Mental Performance:** The included Vitamin B5 (Pantothenic Acid) provides a scientifically confirmed contribution to normal mental performance, supporting cognitive function and focus during highly demanding times.
- **Neurotransmitter & Steroid Hormone Metabolism:** Vitamin B5 contributes provenly to the normal synthesis and metabolism of steroid hormones, Vitamin D, and some neurotransmitters—a crucial interface for supporting normal neurological functions.
- **Energy Metabolism & Fatigue Management:** Vitamin B5 delivers a validated contribution to a normal energy-yielding metabolism and actively aids in the reduction of tiredness and fatigue, supporting the body's natural energy levels.
- **Synergistic Rhodiola Rosea Matrix:** Providing 200 mg of Rhodiola Rosea extract per capsule, the formula supplies highly standardized rosavins and salidroside. This traditionally revered adaptogen perfectly reinforces the Ashwagandha matrix to traditionally support cognitive clarity and holistic mental balance.

FloraSan

L-Theanine

(high-dose)

L-THEANINE (HIGH-DOSE) CELLULAR LONGEVITY & EPIGENETICS

Ingredients: Magnesium bisglycinate, L-Theanine, Pyridoxine hydrochloride (Vitamin B6), Hydroxypropylmethylcellulose (Capsule Shell)

Nutritional value	2 capsules	NRV
L-Theanine	400 mg	-
Magnesium	150 mg	40
Vitamin B6	1,4 mg	100

L-Theanine (high-dose)

Character & Synergy

This high-dose nutraceutical represents the perfect synergy of modern nutri-epigenetics and targeted nutritional support for the nervous system. At the core of its bioactive matrix is the amino acid L-Theanine—a heavily researched compound highly revered in geroscience for its unique nutritional profile. By strategically pairing it with highly bioavailable Magnesium Bisglycinate and bioactive Vitamin B6, this complex provides demanding individuals and biohackers with a high-precision tool to support normal psychological function, mental balance, and the overall well-being of the nervous system.

Traditional Production

The foundation of this premium formulation relies on uncompromising raw material quality and maximum bioavailability. Instead of utilizing inorganic mineral salts, we consistently deploy Magnesium Bisglycinate—an organic chelate compound absorbed with exceptional efficiency via the body's amino acid transport pathways, ensuring maximum gastrointestinal comfort. Paired with ultra-pure L-Theanine and enclosed in a plant-based cellulose capsule, this product guarantees an immaculate clean-label profile. Laboratory-tested, high-dose, and entirely free from synthetic additives or fillers.

Health & Nutritional Science

Our cell-active formula leverages the documented synergies of premium key ingredients and essential micronutrients to support normal neurological and physiological functions:

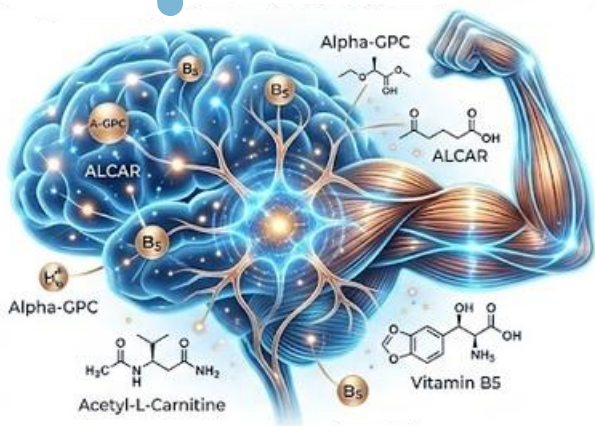

- **High-Dose L-Theanine Matrix:** Each daily dose delivers 400 mg of pure L-Theanine. In modern longevity research, this amino acid is at the forefront of studies investigating the nutritional properties of secondary amino acids in targeted dietary regimens.
- **Nervous System & Psychological Support:** Both Magnesium and Vitamin B6 provide a scientifically confirmed contribution to the normal functioning of the nervous system and normal psychological function, supporting overall mental balance.
- **Regulation of Hormonal Activity:** Vitamin B6 contributes provento to the regulation of hormonal activity—a crucial biochemical intersection for overarching metabolic and physiological balance.
- **Energy Metabolism & Fatigue Management:** Magnesium and Vitamin B6 support a normal energy-yielding metabolism and actively aid in the reduction of tiredness and fatigue, helping to maintain natural cellular energy levels.
- **Muscular Balance & Function:** Organic Magnesium Bisglycinate contributes to normal muscle function and normal protein synthesis, acting as a fundamental co-factor for physical well-being and muscular maintenance during recovery phases.

Alpha-GPC

ALPHA-GPC CELLULAR LONGEVITY & EPIGENETICS

Ingredients: Alpha-GPC (L-Alpha-glycerylphosphorylcholine), Acetyl-L-carnitine hydrochloride, Calcium-D-pantothenate (Vitamin B5), Hydroxypropylmethylcellulose (Capsule Shell)

Nutritional value	1 capsule	NRV
Alpha-GPC	250 mg	-
Acetyl-L-Carnitine	250 mg	-
Vitamin B5	6 mg	100

natural aronia syrup - 500ml

Character & Synergy

This premium nutraceutical represents the peak of modern nutri-epigenetics and targeted nutritional science. At the core of its bioactive matrix is the potent fusion of Alpha-GPC—a highly bioavailable choline source—and Acetyl-L-Carnitine (ALCAR). This advanced formulation was specifically engineered to support cognitive function, mental energy, and the overall well-being of the nervous system. An uncompromising solution for demanding individuals and biohackers looking to combine mental performance with advanced nutritional support for healthy cellular aging.

Traditional Production

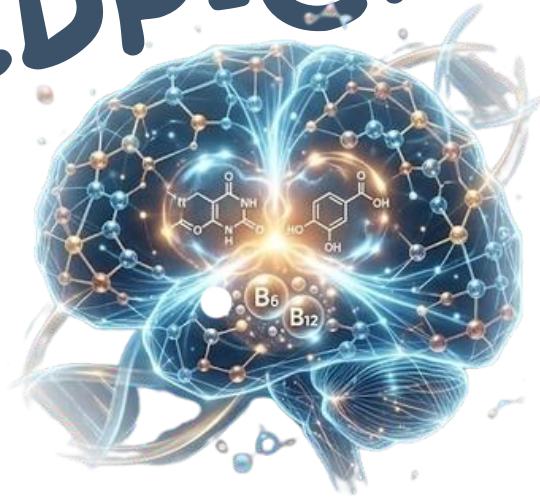

The foundation of this sophisticated formulation relies on the exceptional tissue absorption of its compounds. While conventional forms of choline cross biological barriers with great difficulty, Alpha-GPC offers superior cellular utilization to deliver reliable nutritional integration. This is reinforced by the acetylated form of L-Carnitine (ALCAR), which features excellent bioavailability. Enclosed in pure plant-based cellulose, laboratory-tested, and guaranteed free from synthetic additives or fillers for an immaculate clean-label profile.

Health & Nutritional Science

Our cell-active formula leverages the documented synergies of premium key ingredients and essential co-factors to support normal neurological and cognitive functions:

- **Highly Bioavailable Alpha-GPC Matrix:** Each capsule delivers 250 mg of L-Alpha-Glycerylphosphorylcholin. In longevity research, this bioactive compound is highly revered as a premium choline source to complement targeted dietary regimens.
- **Mental Performance & Cognition:** The included Vitamin B5 (Pantothenic Acid) provides a scientifically confirmed contribution to normal mental performance, supporting cognitive function and focus during demanding tasks.
- **Neurotransmitter & Homeostatic Metabolism:** Vitamin B5 contributes provenly to the normal synthesis and metabolism of steroid hormones, Vitamin D, and some neurotransmitters—a crucial biochemical interface for supporting normal neurological functions.
- **Mitochondrial Energy & Fatigue Reduction:** Vitamin B5 supports a normal energy-yielding metabolism and actively aids in the reduction of tiredness and fatigue, helping to maintain natural cellular energy levels.
- **Advanced Nutritional Support via ALCAR:** Featuring 250 mg of Acetyl-L-Carnitine, the formulation supplies a heavily researched amino acid compound that complements the cell-active matrix, traditionally valued for supporting energy-yielding pathways and overall vitality.

FloraSan CDP-Choline

CDP-CHOLINE CELLULAR LONGEVITY & EPIGENETICS

Ingredients: CDP-Choline (Citicoline), L-Tyrosine, Pyridoxine hydrochloride (Vitamin B6), Hydroxypropylmethylcellulose (Capsule Shell), Methylcobalamin (Vitamin B12)

Nutritional value	1 capsule	NRV
CDP-Choline	250 mg	--
L-Tyrosine	250 mg	--
Vitamin B6	1,4 mg	100
Vitamin B12	2,5µg	100

CDP-Choline

Character & Synergy

This premium nutraceutical represents the peak of modern cellular nutritional science. At the core of its bioactive matrix is CDP-Choline (Citicoline)—a heavily researched, high-molecular nucleotide compound recognized in geroscience as a premium building block to complement targeted dietary regimens. By strategically pairing it with the functional amino acid L-Tyrosine and cell-active co-factors, this complex provides demanding individuals and biohackers with a high-precision tool to support normal psychological function, the normal functioning of the nervous system, and overall vitality.

Craftsmanship & Technology

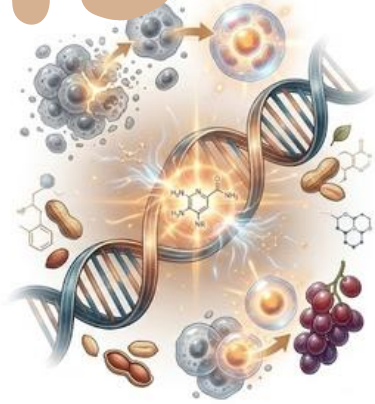

The foundation of this sophisticated formulation relies on superior bioavailability and exceptional tissue affinity. Unlike conventional, low-tier forms of choline, CDP-Choline breaks down into its active constituents upon consumption, offering excellent cellular utilization to deliver reliable nutritional integration. Combined with ultra-pure L-Tyrosine and bioactive Methylcobalamin (Vitamin B12), enclosed in a plant-based cellulose capsule. Laboratory-tested, uncompromisingly pure, and entirely free from synthetic additives or fillers.

Health & Nutritional Science

Our cell-active formula leverages the documented synergies of premium key ingredients and essential micronutrients to support normal neurological and physiological pathways:

- **Highly Bioavailable CDP-Choline Matrix:** Each capsule delivers 250 mg of pure Citicoline. This premium compound serves within the organism as a highly researched choline source to complement the cell-active matrix.
- **Amino Acid Support via L-Tyrosine:** Featuring 250 mg of L-Tyrosine, the formulation supplies a crucial amino acid to complement the targeted nutritional blend within this premium complex.
- **Nervous System Support:** Vitamins B6 and B12 provide a scientifically confirmed contribution to the normal functioning of the nervous system, supporting overall neurological well-being.
- **Maintenance of Psychological Function:** The advanced interplay of Vitamin B6 and B12 aids normal psychological function, supporting the organism in maintaining overall mental balance and emotional well-being.
- **Cell Division & Energy Delivery:** Vitamin B12 plays a scientifically validated, essential role in the process of cell division. Working alongside Vitamin B6, it further supports a normal energy-yielding metabolism, a balanced homocysteine metabolism, and actively contributes to the reduction of tiredness and fatigue.

Fisetin

FISETIN CELLULAR LONGEVITY & EPIGENETICS

Ingredients: Cotinus coggygria extract (contains 98% Fisetin), Sophora japonica extract (contains 95% Quercetin), Zinc picolinate, Black pepper extract (contains 95% Piperine), Hydroxypropylmethylcellulose (Capsule Shell)

Nutritional value	1 capsule	NRV
Fisetin	150 mg	--
Quercetin	150 mg	--
Zinc	10 mg	100
Black Pepper Extract	5 mg	--
– of which Piperine	4,75 mg	--

Fisetin

Character & Synergy

This premium nutraceutical represents the absolute vanguard of modern longevity research and cellular support. At the core of its bioactive matrix are Fisetin and Quercetin—two heavily researched botanical flavanoids recognized in geroscience as highly valued polyphenols. They specifically target the nutritional complementation of cell-active regimens. Through its strategic synergy with essential Zinc and a natural bioavailability amplifier, this complex provides demanding individuals and biohackers with a high-performance tool designed to support cellular health and antioxidant protection.

Traditional Production

The foundation of this sophisticated formulation relies on molecular purity and maximized tissue absorption. Because polyphenols like Fisetin exhibit naturally low absorption rates, our formula integrates a highly standardized Black Pepper extract with a strictly defined content of pure Piperine. This acts as a natural biocatalyst, designed to support the intestinal uptake of the bioactive flavonoids within the organism. Enclosed in pure plant-based cellulose, laboratory-tested, and uncompromisingly free from synthetic additives or fillers for an immaculate clean-label profile.

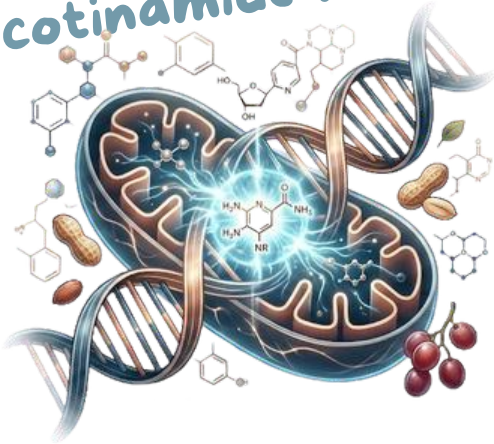

Health & Nutritional Science

Our cell-active formula leverages the documented synergies of premium key ingredients and essential trace elements to support core cellular and physiological functions:

- **High-Dose Fisetin & Quercetin Matrix:** Each capsule delivers 150 mg of pure Fisetin (98% standardization) and 150 mg of Quercetin (95% standardization). This advanced polyphenolic pairing is at the global forefront of cutting-edge research regarding secondary plant metabolites in targeted wellness regimens.
- **Advanced DNA Synthesis Support:** The included Zinc (as highly absorbable Zinc Picolinate) provides a scientifically confirmed contribution to normal DNA synthesis, supports normal protein synthesis, and plays a role in the process of cell division.
- **Defense Against Oxidative Stress:** Zinc contributes provenly to protecting cells from oxidative stress—a foundational mechanism required within healthy aging protocols to protect vital cellular structures, proteins, and lipids from oxidative damage.
- **Immunological Balance & Integrity:** This essential trace element delivers a validated contribution to the normal function of the immune system, supporting the body's natural defense mechanisms at a cellular level.
- **Metabolic & Macronutrient Homeostasis:** Zinc actively contributes to normal fatty acid, carbohydrate, and acid-base metabolism, alongside normal protein synthesis, comprehensively supporting the metabolic integrity of cells.

NR

Nicotinamide riboside

NR - NICOTINAMIDE RIBOSIDE CELLULAR LONGEVITY & EPIGENETICS

Ingredients: Nicotinamide riboside chloride, Hydroxypropylmethylcellulose (Capsule Shell)

Nutritional value	1 capsule	NRV
Nicotinamide Riboside	300 mg	--

NR - Nicotinamide riboside

Character & Synergy

This next-generation longevity nutraceutical represents the vanguard of cellular nutritional science. At the core of its molecular matrix is Nicotinamide Riboside (NR)—a highly researched, potent cellular precursor utilized in modern geroscience to study the biochemical networks of NAD⁺ (Nicotinamide Adenine Dinucleotide). By delivering a high-dose mono-substance, this advanced formulation provides demanding individuals and biohackers with a high-precision molecular tool designed to complement targeted nutritional regimens focused on cellular well-being and advanced dietary goals.

Traditional Production

The foundation of this sophisticated formulation relies on maximum molecular stability and uncompromised clean-label purity. Conventional cellular substrates often exhibit low stability or poor utilization profiles when processed. Our premium Nicotinamide Riboside is crafted through advanced biosynthetic precision designed to yield an immaculate, highly bioavailable crystalline structure for efficient nutrient absorption. Enclosed in pure plant-based cellulose, laboratory-tested, and strictly free from synthetic additives, flowing agents, or fillers.

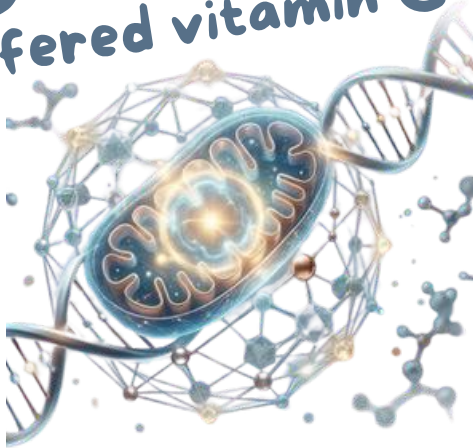

Health & Nutritional Science

Our cell-active formula focuses exclusively on the nutritional integration of coenzyme precursors and premium cellular components:

- **High-Dose Nicotinamide Riboside Matrix:** Each capsule delivers 300 mg of pure Nicotinamide Riboside. In modern longevity research, this vital compound is at the global forefront of groundbreaking studies analyzing the role of secondary vitamin derivatives in cellular nutrition.
- **Mitochondrial & Cellular Co-Factors:** Nicotinamide Riboside serves as a highly valued compound within modern lifestyle supplementation, providing the essential nutritional building blocks widely researched for complementing cellular dynamics and overall physical vitality.
- **Botanical & Molecular Matrices:** Sustaining a robust nutrient pool is recognized in advanced nutrition as a fundamental key to complementing the diet. This premium complex is designed to functionally support targeted wellness lifestyles.
- **Nutritional Cell Homeostasis:** By providing essential nutritional components to complement cellular environments, the formula helps support daily well-being, comprehensively safeguarding the nutritional integrity of the overall dietary intake over the long term.

Ca-AKG buffered vitamin C

CA-AKG - BUFFERED VITAMIN C CELLULAR LONGEVITY & EPIGENETICS

Ingredients: Calcium-Alpha-Ketoglutarate, Magnesium ascorbat (Vitamin C), Hydroxypropylmethylcellulose (Capsule Shell)

Nutritional value	1 capsule	NRV
Calcium-Alpha-Ketoglutarate	450 mg	--
– of which Calcium	54 mg	6.8
Vitamin C	80 mg	100

Ca-AKG - buffered vitamin C

Character & Synergy

This premium nutraceutical represents the absolute vanguard of modern cellular nutritional science. At the core of its bioactive matrix is Calcium-Alpha-Ketoglutarate (Ca-AKG)—a pivotal metabolic intermediate heavily researched in geroscience for its unique nutritional properties. By strategically pairing it with stomach-friendly, buffered Vitamin C, this complex provides demanding individuals and biohackers with a high-performance tool designed to support a normal energy-yielding metabolism, cellular protection against oxidative stress, and bone health.

Traditional Production

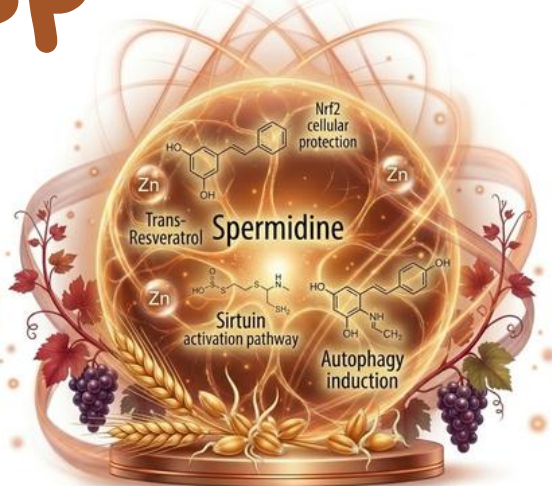

The foundation of this sophisticated formulation relies on molecular stability and optimal gastrointestinal tolerance. While conventional, free alpha-ketoglutaric acids are inherently unstable and can cause digestive discomfort, binding the compound to calcium (as Ca-AKG) ensures protected, time-released delivery and exceptional tissue absorption. This matrix is comprehensively enhanced by buffered Vitamin C (as Magnesium Ascorbat), which reacts acid-free to pass the gastric barrier with utmost comfort. Enclosed in pure plant-based cellulose, laboratory-tested, and uncompromisingly free from synthetic additives or fillers for an immaculate clean-label profile.

Health & Nutritional Science

Our cell-active formula leverages the documented synergies of premium key ingredients and essential micronutrients to support core physiological functions:

- **High-Dose Calcium-Alpha-Ketoglutarate (Ca-AKG):** Each capsule delivers 450 mg of pure Ca-AKG. In modern longevity research, this endogenous metabolite is at the global forefront of groundbreaking studies investigating its role as a premium compound to complement targeted dietary regimens.
- **Defense Against Oxidative Stress:** The included Vitamin C (sourced from buffered Magnesium Ascorbat) provides a scientifically confirmed contribution to protecting cells from oxidative stress—a foundational mechanism required to help protect cellular components from oxidative damage.
- **Activation of Energy Metabolism:** Both Calcium and Vitamin C contribute provenly to a normal energy-yielding metabolism, supporting the body's daily energy production.
- **Structural Support & Collagen Synthesis:** Vitamin C contributes to normal collagen formation for the normal function of bones, cartilage, skin, and blood vessels. Simultaneously, Calcium is needed for the maintenance of normal bones and teeth.
- **Cellular Signaling & Immune Integrity:** Calcium delivers a validated contribution to normal neurotransmission (cellular signaling) and supports normal muscle function. Concurrently, Vitamin C contributes to the normal function of the immune system, supporting the body's natural defense mechanisms at a cellular level.

FloraSan Spermidine

Spermidine

Character & Synergy

This premium nutraceutical represents the absolute vanguard of modern geroscience and cellular support. At the core of its bioactive matrix is Spermidine—a heavily researched polyamine recognized in cell biology as a highly valued cellular component. By strategically pairing it with ultra-pure Trans-Resveratrol and essential Zinc, this complex provides demanding individuals and biohackers with a high-performance tool designed to support cellular health and antioxidant protection.

Traditional Production

The foundation of this sophisticated formulation relies on uncompromising standardization and botanical purity. Our spermidine is gently concentrated from premium wheat germ to deliver a strictly defined active content per dose. This is synergistically combined with pure Trans-Resveratrol and organically chelated Zinc Bisglycinate, which features superior stability and exceptional gastrointestinal tolerance. Enclosed in pure plant-based cellulose, laboratory-tested, and completely free from synthetic additives or fillers for an immaculate clean-label profile.

SPERMIDINE CELLULAR LONGEVITY & EPIGENETICS

Ingredients: Wheat germ extract (*Triticum aestivum*, contains 1% Spermidine), *Polygonum cuspidatum* root extract (contains 98% Trans-Resveratrol), Zinc bisglycinate, Hydroxypropylmethylcellulose (Capsule Shell)

Nutritional value	1 capsule	NRV
Wheat Germ Extract	600 mg	--
– of which Spermidine	6 mg	--
Trans-Resveratrol	100 mg	--
Zinc	10 mg	100

Health & Nutritional Science

Our cell-active formula leverages the documented synergies of premium key ingredients and essential trace elements to support core cellular and physiological functions:

- **Highly Standardized Spermidine & Resveratrol Matrix:** Each capsule delivers 6 mg of bioactive Spermidine (from 600 mg of premium Wheat Germ extract) paired with 100 mg of pure Trans-Resveratrol. This advanced polyamine and polyphenolic network is at the global forefront of cutting-edge research regarding secondary plant metabolites in targeted wellness regimens.
- **Advanced Defense Against Oxidative Stress:** The included Zinc (sourced from highly absorbable Zinc Bisglycinate) provides a scientifically confirmed contribution to protecting cells from oxidative stress—a foundational mechanism required within healthy aging protocols to protect vital cellular structures, lipids, and proteins from oxidative damage.
- **DNA Synthesis Support & Cell Division:** Zinc contributes to normal DNA synthesis, supports normal protein synthesis, and plays a role in the process of cell division.
- **Immunological Balance & Integrity:** This essential trace element delivers a validated contribution to the normal function of the immune system, supporting the body's natural defense mechanisms at a cellular level.
- **Metabolic & Macronutrient Homeostasis:** Zinc actively contributes to normal fatty acid and carbohydrate metabolism, alongside normal protein synthesis and a balanced acid-base metabolism, comprehensively supporting the structural and metabolic integrity of cells.

FloraSan

Urolithin A

UROLITHIN A CELLULAR LONGEVITY & EPIGENETICS

Ingredients: Urolithin A,
Hydroxypropylmethylcellulose (Capsule
Shell)

Nutritional value	1 capsule	NRV
Urolithin A	500 mg	--

Character & Synergy

This high-end nutraceutical represents a milestone in modern cellular nutritional science. At the core of its formulation is Urolithin A—a heavily researched, bioactive metabolite recognized in geroscience as a highly innovative cellular component studied in cellular biology. By delivering a high-dose mono-substance, this complex provides demanding individuals, athletes, and biohackers with a precise molecular tool designed to complement targeted dietary regimens focused on advanced nutritional goals and long-term well-being.

Traditional Production

The foundation of this premium product relies on uncompromising purity and bioavailability completely independent of the body's microbiome. Because the natural conversion of dietary precursors (such as polyphenols from pomegranates) into Urolithin A depends heavily on individual gut flora—and cannot be achieved by a large percentage of the population—this formula supplies the metabolite in a directly usable, ultra-pure form. Enclosed in pure plant-based cellulose, laboratory-tested, and strictly free from synthetic additives, colorants, or fillers for an immaculate clean-label profile

Health & Nutritional Science

Our cell-active formula focuses exclusively on the nutritional integration of specific metabolic metabolites and targeted cellular components:

- **High-Dose Urolithin A Matrix:** Each capsule delivers 500 mg of pure Urolithin A. This cell-active metabolite is at the global forefront of groundbreaking clinical studies investigating the role of postbiotics in specialized dietary regimens designed to complement general tissue health during the aging process.
- **Nutritional Support & Mitochondrial Matrices:** At a molecular level, Urolithin A serves as a highly advanced compound to complement the cell-active matrix, acting as a valuable nutritional building block widely researched for its unique properties regarding cellular components.
- **Complementation of Cellular Pathways:** By nutritionally initiating this premium formulation, the complex helps support targeted wellness lifestyles, sustainably complementing advanced dietary regimens.
- **Sustaining Cellular Well-Being:** Maintaining a healthy nutrient intake is recognized in modern longevity medicine as a fundamental key to supporting daily vitality, comprehensively safeguarding the nutritional integrity of the overall diet over the long term.

Organic medicinal mushrooms

Myco-Adaptogens – The Evolution of Cellular Balance.

The Purity of Scientific Mycotherapy

At FloraSan, cellular optimization does not mean compromising on extraction quality. Our premium medicinal mushrooms are based on highly advanced, standardized hot-water extracts that deliver the full spectrum of native biopolymers. By precisely and gently disrupting the chitin-rich cell walls, the bioactive triterpenes, nucleosides, and glycoproteins are released in their purest form. We strictly avoid artificial additives, cheap carriers, or unphysiological fillers. Certified from controlled organic cultivation, these extracts offer an unadulterated and safe nutritive asset that meets the highest clean-label standards.

The Heritage of Traditional Mycotherapy

Historically, functional mushrooms have been valued for millennia as honest tonics for vitality and longevity. FloraSan continues this biological legacy by merging traditional mushroom lore with the latest breakthroughs in modern geroscience. We offer a high-quality, adaptogenic alternative to isolated compounds that provides deep systemic support without shifting the body's natural baseline.

The Principles of Pure Cellular Regulation

Our approach is defined by the following core principles that support the functional quality and synergistic benefit of every single extract:

- **The Signature of Resilience:** Mushrooms like Reishi and Chaga thrive under harsh environmental conditions. We capture this native resilience to provide traditional botanical support for overall well-being and the body's natural capacity to adapt to daily lifestyle stressors.
- **Holistic Synergy:** True cellular balance comes from the complex interplay of specific beta-glucans and functional marker compounds like the SX-fraction or hericenones. Our extracts preserve these molecular networks to complement targeted nutritional regimens.
- **Natural Vitalization:** The valuable nucleosides (such as cordycepin and adenosine) and acidic polysaccharides serve as a clean, direct source of cellular dynamics. Every formulation is designed to complement daily vitality and support the natural defense mechanisms of the body in a highly efficient way.

Maitake

MAITAKE ORGANIC MEDICINAL MUSHROOMS MYCOTHERAPY

Flexible Product Solutions & Contract Manufacturing

- **Processing Forms:** Available as ultra-pure organic mushroom powder, standardized organic hot-water extract, or customized bulk blends.
- **Customization:** We offer tailored compositions and client-specific formulation development—perfectly aligned with your brand identity.
- **Quality Assurance:** 100% certified organic cultivation

Bio Maitake – The Botanical Matrix

The Biological Evolution of Cellular Balance

Among the great representatives of functional mycology, the Maitake (*Grifola frondosa*) holds an absolute exceptional status. While other renowned vital mushrooms primarily complement specific nutritional regimens, the Maitake stands as nature's most finely tuned botanical matrix. Its evolutionary distinction lies within a highly specific molecular architecture that fundamentally separates it from any other vital mushroom on a biochemical level, making it the ideal companion for modern, health-conscious performers.

The Molecular Core Feature: The SX-Fraction and Beta-Glucans

The defining difference from conventional mushrooms lies in the diversity of its bioactive components. Alongside high-molecular-weight beta-glucans that are widely researched in cell biology, the Maitake possesses a scientifically heavily researched, exclusive key compound, the so-called SX-fraction (a specific, protein-bound polysaccharide). In modern geroscience and metabolic research, this fraction is in the spotlight because, in combination with unique Maitake glycoproteins, it is at the forefront of studies investigating cellular interactions regarding nutrition.

Optimized Cell-Wall Extraction for Uncompromising Purity

The efficacy of our Bio Maitake formulation relies on state-of-the-art galenic precision. Because valuable active compounds like the SX-fraction are tightly locked within the mushroom's indigestible chitin scaffold, we utilize an advanced, gentle hot-water extraction process. This precisely breaks open the tough cell walls of the Bio Maitake without damaging the delicate, temperature-sensitive polysaccharide structures. The result is a highly concentrated, pure premium extract featuring maximum bioavailability—entirely free from artificial additives and 100% sourced from certified organic cultivation.

Scientific Perspectives on Cellular Protection

To present the extraordinary, natural properties of Maitake with scientific precision, modern research focuses entirely on the native spectrum of the mushroom's own biopolymers and protein complexes. Research into this unique functional mushroom delivers fascinating insights into cellular biochemistry:

- **Focus on Metabolic Networks:** In international natural compound research, Maitake is at the absolute center of studies analyzing the influence of the native, protein-bound SX-fraction on nutritional mechanisms, as well as general cellular well-being.
- **Biochemistry of Glycoproteins:** The mushroom supplies highly specific, organic compounds that are actively investigated in cell biology models for their unique nutritional properties and role in complementing targeted dietary regimens.
- **Cellular Support & Immune Complementation:** The mushroom-specific beta-glucans concentrated within the extract serve as a premium component to complement the diet. They are highly valued for their capacity to functionally support targeted wellness lifestyles and nutritionally support the body's natural defense mechanisms as part of a balanced diet.

FloraSan

Reishi

REISHI ORGANIC MEDICINAL MUSHROOMS MYCOTHERAPY

Flexible Product Solutions & Contract Manufacturing

- **Processing Forms:** Available as ultra-pure organic mushroom powder, standardized organic hot-water extract, or customized bulk blends.
- **Customization:** We offer tailored compositions and client-specific formulation development—perfectly aligned with your brand identity.
- **Quality Assurance:** 100% certified organic cultivation

Bio Reishi – The Botanical Matrix

The Biological Evolution of Inner Balance

Among the great representatives of functional mycology, the Reishi (*Ganoderma lucidum*) holds a venerable, exceptional status. Revered for millennia as the "Mushroom of Immortality," it is a prime focus in modern geroscience for its unique molecular structure researched for complementing daily well-being and supporting overall vitality. Its evolutionary distinction lies within an extraordinarily dense natural compound architecture, making it the ideal premium raw material for modern performers seeking traditional botanical complementation and holistic nutritional support.

The Molecular Core Feature: Triterpenes and Bioactive Beta-Glucans

The defining biochemical difference between Reishi and other vital mushrooms lies in its powerful duality of polysaccharides and lipid-soluble secondary metabolites. It delivers a vast spectrum of highly specific triterpenes (particularly ganoderic acids), which are heavily analyzed in modern inflammatory pathway research. Together with complex beta-glucans, this unique compound pairing builds a synergistic network that is widely studied in cell biology for its role in complementing targeted wellness lifestyles and supporting the organism under demanding everyday conditions.

Optimized Cell-Wall Extraction for Maximum Bioavailability

The biological efficacy of our Bio Reishi formulation relies on state-of-the-art mycological separation pathways. Because both triterpenes and beta-glucans are tightly locked within the mushroom's woody chitin scaffold, we utilize a sophisticated, gentle extraction process. This precisely breaks open the tough cell walls of the Bio Reishi without fragmenting the temperature-sensitive active structures. The result is an ultra-pure premium extract that delivers both water-soluble polysaccharides and fat-soluble triterpenes in a highly bioavailable form.

Scientific Perspectives on Cellular Protection

To present the extraordinary, natural properties of Reishi with scientific precision, modern research focuses entirely on the native spectrum of the mushroom's own biopolymers and secondary metabolites. Research into this venerable functional mushroom delivers fascinating insights into cellular biochemistry:

- **Harmonization & Inner Balance:** In international natural compound research, Reishi is at the center of studies analyzing the influence of native triterpenes (particularly the exclusive ganoderic acids) as traditional botanical components studied for their relationship with general physiological balance and the body's natural adaptation to everyday stress.
- **Immune System Complementation:** The mushroom supplies complex, high-molecular-weight beta-glucans that are actively investigated in cell biology models for their unique nutritional properties and their role in complementing a balanced diet.
- **Cellular Support & Botanical Defense:** The bioactive compounds concentrated within the extract serve as a premium natural matrix. They are highly valued in geroscience for their capacity to functionally support targeted wellness lifestyles, nutritionally complement cellular well-being, and support the general integrity of the diet.

LION'S MANE ORGANIC MEDICINAL MUSHROOMS MYCOTHERAPY

Flexible Product Solutions & Contract Manufacturing

- **Processing Forms:** Available as ultra-pure organic mushroom powder, standardized organic hot-water extract, or customized bulk blends.
- **Customization:** We offer tailored compositions and client-specific formulation development—perfectly aligned with your brand identity.
- **Quality Assurance:** 100% certified organic cultivation

Bio Lion's Mane – The Botanical Matrix

The Biological Evolution of Cognitive Dynamics Gentle Cell-Wall Disruption for Maximum Bioavailability

Among the great representatives of functional mycology, the Lion's Mane (*Hericium erinaceus*) holds a pioneering, exceptional status. Traditionally revered as a supreme tonic for the mind, it is a center of focus in modern neuro-nutrition and geroscience for its unique molecular structure researched for complementing daily well-being and supporting overall mental vitality. Its evolutionary distinction lies within a highly specific natural compound architecture, making it the ideal premium raw material for modern performers seeking traditional botanical complementation and holistic nutritional support.

The Molecular Core Feature: Hericenones and Neuronal Pathways

The defining biochemical difference between Lion's Mane and other vital mushrooms lies within its unique, low-molecular-weight secondary metabolites. It delivers an exclusive spectrum of hericenones (found within the fruit body) alongside complex polysaccharides. In modern cellular research, this specific group of compounds is in the spotlight because it addresses nutritional parameters studied in cell biology for their role in complementing targeted wellness lifestyles and supporting the organism under demanding everyday conditions.

The biological efficacy of our Bio Lion's Mane formulation relies on sophisticated mycological processing techniques. Because both the valuable hericenones and complex beta-glucans are tightly locked within the mushroom's tough chitin cell wall, we deploy an advanced, temperature-controlled extraction process. This precisely breaks open the rigid cell walls of the Bio Lion's Mane without degrading the delicate active structures. The result is an ultra-pure premium extract that delivers these bioactive marker compounds in a highly bioavailable form for human cells.

Scientific Perspectives on Cellular Protection

To present the extraordinary, natural properties of Lion's Mane with scientific precision, modern research focuses entirely on the native spectrum of the mushroom's own biopolymers. Research into this unique functional mushroom delivers fascinating insights into cellular biochemistry:

- **Focus on Cognitive Networks:** In international natural compound research, Lion's Mane is at the absolute center of studies analyzing the influence of native hericenones and amyconones as traditional botanical components studied for their relationship with general physiological balance and the maintenance of daily vitality throughout the aging process.
- **Biochemistry of Co-Factors:** The mushroom supplies valuable, organic co-factors that are actively investigated in cell biology models for their unique nutritional properties and their role in complementing a balanced diet.
- **Cellular Support & Membrane Complementation:** The mushroom-specific beta-glucans and glycoproteins concentrated within the extract serve as a premium natural matrix. They are highly valued for their capacity to functionally support targeted wellness lifestyles, nutritionally complement cellular well-being, and support the general integrity of the diet.

FloraSan Chaga

REISHI ORGANIC MEDICINAL MUSHROOMS MYCOTHERAPY

Flexible Product Solutions & Contract Manufacturing

- **Processing Forms:** Available as ultra-pure organic mushroom powder, standardized organic hot-water extract, or customized bulk blends.
- **Customization:** We offer tailored compositions and client-specific formulation development—perfectly aligned with your brand identity.
- **Quality Assurance:** 100% certified organic cultivation

Bio Chaga – The Botanical Matrix

The Biological Evolution of Cellular Resilience

Among the great representatives of functional mycology, the Chaga (*Inonotus obliquus*) holds an absolutely powerful, exceptional status. Revered in subarctic regions as the "Gold of the Forest," this unique mushroom stands at the absolute center of modern geroscience and cellular research for its unparalleled molecular structure researched for complementing daily well-being. Its evolutionary distinction lies within an extremely dense, protective natural compound architecture, making it the ideal premium raw material for demanding individuals seeking traditional botanical complementation and long-term vitality.

The Molecular Core Feature: Melanin, Polyphenols and Betulinic Acid

The biological efficacy of our Bio Chaga formulation relies on sophisticated mycological extraction pathways. Because the valuable protective compounds are tightly locked within the mushroom's hard, woody chitin cell walls, we deploy an advanced, temperature-controlled hot-water extraction process. This precisely breaks open the rigid cell walls of the Bio Chaga to release the delicate polysaccharides, chromogens, and polyphenols. The result is an ultra-pure premium extract that delivers these bioactive marker compounds in a highly bioavailable form for human cells.

Precise Hot-Water Extraction for Maximum Bioactivity

The biological efficacy of our Bio Chaga formulation relies on sophisticated mycological extraction pathways. Because the valuable protective compounds are tightly locked within the mushroom's hard, woody chitin cell walls, we deploy an advanced, temperature-controlled hot-water extraction process. This precisely breaks open the rigid cell walls of the Bio Chaga to release the delicate polysaccharides, chromogens, and polyphenols. The result is an ultra-pure premium extract that delivers these bioactive marker compounds in a highly bioavailable form for human cells.

Scientific Perspectives on Cellular Protection

To present the extraordinary, natural properties of Chaga with scientific precision, modern research focuses entirely on the native spectrum of the mushroom's own biopolymers and organic acids. Research into this robust functional mushroom delivers fascinating insights into cellular biochemistry:

- **Focus on Botanical Properties & Cellular Longevity:** In international natural compound research, Chaga is recognized as one of the richest sources of native antioxidants. Studies intensively analyze the influence of its polyphenols as traditional components studied for their relationship with cellular well-being and the maintenance of daily vitality.
- **Modulation of Cellular Parameters:** The betulinic acid and specific triterpenes concentrated within the extract are actively investigated in cell biology models for their unique nutritional properties and role in complementing targeted lifestyle regimens.
- **Protection & Balance of Internal Barriers:** The native polysaccharides (beta-glucans) serve as a natural support for internal biological barriers. They are highly valued in mycology for their soothing properties on the digestive tract and their role in supporting the body's natural defense mechanisms as part of a balanced diet.

FloraSan Cordyceps

CORDYCEPS ORGANIC MEDICINAL MUSHROOMS MYCOTHERAPY

Flexible Product Solutions & Contract Manufacturing

- **Processing Forms:** Available as ultra-pure organic mushroom powder, standardized organic hot-water extract, or customized bulk blends.
- **Customization:** We offer tailored compositions and client-specific formulation development—perfectly aligned with your brand identity.
- **Quality Assurance:** 100% certified organic cultivation

Bio Cordyceps – The Botanical Matrix

The Biological Evolution of Cellular Dynamics

Among the great representatives of functional mycology, the Cordyceps holds an absolutely vital, exceptional status. Revered for centuries in high-altitude regions as a traditional tonic, this extraordinary mushroom stands at the absolute center of modern geroscience and exercise physiology for its unique molecular structure researched for complementing daily well-being. Its evolutionary distinction lies within a highly specific natural compound architecture, making it the ideal premium raw material for demanding individuals and athletes seeking traditional botanical complementation and holistic nutritional support.

The Molecular Core Feature: Cordycepin, Adenosine, and ATP Synthesis

The defining biochemical difference between Cordyceps and conventional mushrooms lies in its unique arsenal of bioactive nucleoside derivatives. It delivers an exclusive spectrum of native cordycepin and adenosine, alongside specific mushroom polysaccharides. In modern metabolic research, this specific compound complex is in the spotlight because it addresses nutritional parameters studied in cell biology for their role in complementing targeted wellness lifestyles and supporting the overall diet.

Precise Hot-Water Extraction for Maximum Bioavailability

The biological efficacy of our Bio Cordyceps formulation relies on sophisticated mycological extraction pathways. Because the valuable nucleosides and complex beta-glucans are tightly locked within the mushroom's tough chitin cell wall, we deploy an advanced, temperature-controlled hot-water extraction process. This precisely breaks open the rigid cell walls of the Bio Cordyceps without thermally degrading the delicate, bioactive molecular structures. The result is an ultra-pure premium extract that delivers these marker compounds in a highly bioavailable form for human cells.

Scientific Perspectives on Cellular Protection

To present the extraordinary, natural properties of Cordyceps with scientific precision, modern research focuses entirely on the native spectrum of the mushroom's own nucleosides and biopolymers. Research into this powerful functional mushroom delivers fascinating insights into cellular biochemistry:

- **Focus on Mitochondrial Parameters & Endurance:** In international natural compound research, Cordyceps is at the center of studies analyzing the influence of native cordycepin as a traditional botanical component studied for its relationship with cellular energy dynamics and general physical performance limits.
- **Regulation of Cellular Parameters:** The concentrated active compounds and sterols within the extract are actively investigated in cell biology models for their unique nutritional properties and role in supporting the body's natural adaptation to everyday stress.
- **Cellular Support & Botanical Defense:** The mushroom-specific polysaccharides serve as a premium natural matrix. They are highly valued in mycology for their capacity to functionally support targeted wellness lifestyles, nutritionally complement cellular well-being, and support the general integrity of the diet.

FloraSan Shiitake

SHIITAKE ORGANIC MEDICINAL MUSHROOMS MYCOTHERAPY

Flexible Product Solutions & Contract Manufacturing

- **Processing Forms:** Available as ultra-pure organic mushroom powder, standardized organic hot-water extract, or customized bulk blends.
- **Customization:** We offer tailored compositions and client-specific formulation development—perfectly aligned with your brand identity.
- **Quality Assurance:** 100% certified organic cultivation

Bio Shiitake – The Botanical Matrix

The Biological Evolution of Vascular Balance

Among the great representatives of functional mycology, the Shiitake (*Lentinula edodes*) holds an absolutely fundamental, exceptional status. Revered for centuries in Asian traditions as the "King of Mushrooms," this extraordinary mushroom stands at the absolute center of modern geroscience and nutritional physiology for its unique molecular structure researched for complementing daily well-being. Its evolutionary distinction lies within a highly specific natural compound architecture, making it the ideal premium raw material for demanding individuals seeking traditional botanical complementation, general vitality, and holistic nutritional support.

The Molecular Core Feature: Lentinan, Eritadenine, and Lipid Regulation

The defining biochemical difference between Shiitake and conventional mushrooms lies in its exclusive arsenal of specific amino acid derivatives and high-molecular-weight biopolymers. It delivers the heavily researched beta-glucan lentinan alongside the unique nucleoside analog eritadenine. In modern metabolic and vascular research, this specific compound complex is in the spotlight because it addresses nutritional parameters closely studied in cell biology for their role in complementing targeted wellness lifestyles and supporting a balanced diet.

Precise Hot-Water Extraction for Maximum Bioavailability

The biological efficacy of our Bio Shiitake formulation relies on sophisticated mycological extraction pathways. Because the valuable compounds like lentinan are tightly locked within the mushroom's tough chitin cell wall, we deploy an advanced, temperature-controlled hot-water extraction process. This precisely breaks open the rigid cell walls of the Bio Shiitake without thermally degrading the delicate, bioactive polysaccharide and protein structures. The result is an ultra-pure premium extract that delivers these marker compounds in a highly bioavailable form for human cells.

Scientific Perspectives on Cellular Protection

To present the extraordinary, natural properties of Shiitake with scientific precision, modern research focuses entirely on the native spectrum of the mushroom's own amino acids and biopolymers. Research into this powerful functional mushroom delivers fascinating insights into cellular biochemistry:

- **Focus on Vascular Parameters & Nutritional Balance:** In international natural compound research, Shiitake is at the center of studies analyzing the influence of native eritadenine as a traditional botanical component studied for its relationship with general cellular parameters and wellness regimens.
- **Modulation of Cellular Parameters:** The lentinan concentrated within the extract is actively investigated in cell biology models for its unique nutritional properties and its role in complementing the body's natural defense mechanisms as part of a balanced diet.
- **Cellular Support & Botanical Defense:** The mushroom-specific compounds and polyphenols serve as a premium natural matrix. They are highly valued in mycology for their capacity to functionally support targeted wellness lifestyles, nutritionally complement cellular well-being, and support the general integrity of the diet.

FloraSan Tremella

TREMELLA ORGANIC MEDICINAL MUSHROOMS MYCOTHERAPY

Flexible Product Solutions & Contract Manufacturing

- **Processing Forms:** Available as ultra-pure organic mushroom powder, standardized organic hot-water extract, or customized bulk blends.
- **Customization:** We offer tailored compositions and client-specific formulation development—perfectly aligned with your brand identity.
- **Quality Assurance:** 100% certified organic cultivation

Bio Tremella – The Botanical Matrix

The Biological Evolution of Tissue Balance

Among the great representatives of functional mycology, the Tremella holds an absolutely unique, exceptional status. Revered for centuries in Asian beauty traditions as a supreme tonic, this extraordinary mushroom stands at the absolute center of modern geroscience and neurobiology for its unique molecular structure researched for complementing daily well-being. Its evolutionary distinction lies within a highly specific natural compound architecture, making it the ideal premium raw material for demanding individuals seeking traditional botanical complementation, general vitality, and holistic nutritional support.

The Molecular Core Feature: Glucuronoxylomannans and Cellular Moisture Binding

The defining biochemical difference between Tremella and conventional mushrooms lies in the structure of its acidic, heterogenous polysaccharides. It delivers an exclusive spectrum of glucuronoxylomannans. In modern research, this specific compound complex is in the spotlight because its molecular framework can hold a multiple of its own weight in water. This biological matrix addresses nutritional parameters closely studied in cell biology for their role in complementing targeted wellness lifestyles and supporting a balanced diet.

Precise Hot-Water Extraction for Maximum Bioavailability

The biological efficacy of our Bio Tremella formulation relies on sophisticated mycological extraction pathways. Because the valuable moisture-binding polysaccharides are tightly locked within the mushroom's gelatinous chitin cell structure, we deploy an advanced, temperature-controlled hot-water extraction process. This precisely breaks open the cellular barriers of the Bio Tremella without thermally degrading the delicate, high-molecular-weight polymer chains. The result is an ultra-pure premium extract that delivers these marker compounds in a highly bioavailable form for human cells.

Scientific Perspectives on Cellular Protection

To present the extraordinary, natural properties of Tremella with scientific precision, modern research focuses entirely on the native spectrum of the mushroom's own biopolymers. Research into this powerful functional mushroom delivers fascinating insights into cellular biochemistry:

- **Focus on Botanical Properties & Structure:** In international natural compound research, Tremella is at the center of studies analyzing the influence of its specific polysaccharides as traditional components studied for their relationship with general skin wellness, outer moisture balance, and the maintenance of daily vitality.
- **Cellular Parameters:** The concentrated compounds within the extract are actively investigated in cell biology models for their unique nutritional properties and role in complementing targeted lifestyle regimens.
- **Cellular Support & Botanical Defense:** The mushroom-specific compounds serve as a premium natural matrix. They are highly valued in mycology for their capacity to functionally support targeted wellness lifestyles, nutritionally complement cellular well-being, and support the body's natural defense mechanisms as part of a balanced diet.

FloraSan

Mushroom Coffee

PREMIUM MUSHROOM COFFEE MEDICINAL MUSHROOMS MYCOTHERAPY

Flexible Product Solutions & Contract Manufacturing

- **Processing Forms:** Available as ultra-pure mushroom powder, standardized hot-water extract, or customized instant coffee blends.
- **Quality Assurance:** 100% controlled and standardized cultivation.

Premium Mushroom Coffee – The Synergistic Botanical Matrix

The Biological Evolution of Functional Energy Precise Hot-Water Extraction for Maximum Bioavailability

Among the great representatives of functional mycology, this premium blend holds an absolutely unique, exceptional status. Scientifically formulated to combine the invigorating properties of selected coffee with six adaptogenic mushrooms, this matrix stands at the absolute center of modern cellular lifestyle and neurobiology. Its evolutionary distinction lies within a highly specific, multi-species compound architecture, making it the ideal premium formulation for demanding individuals seeking sustainable cognitive support, general vitality, and holistic nutritional balance without the typical caffeine crash.

The Molecular Core Feature: Adaptogenic Synergies and Cellular Resilience

The defining biochemical difference of this formulation lies in the intricate synergy of its multi-mushroom spectrum. While conventional coffee provides temporary stimulation, this biological matrix delivers a broad spectrum of active polysaccharides, triterpenes, and beta-glucans. In modern research, these specific compound complexes are in the spotlight because their molecular frameworks function as metabolic modulators. This advanced blend addresses physiological parameters closely studied in cell biology for their role in optimizing daily performance, supporting cognitive clarity, and complementing a balanced diet.

The biological efficacy of our premium formulation relies on sophisticated mycological extraction pathways. Because the valuable functional compounds are tightly locked within the mushrooms' complex chitin cell structures, we deploy an advanced, temperature-controlled hot-water extraction process. This precisely breaks open the cellular barriers of the selected fruiting bodies without thermally degrading the delicate, high-molecular-weight polymer chains. The result is an ultra-pure, premium instant blend that delivers these crucial marker compounds in a highly bioavailable form for human cells, perfectly dissolving in both hot and cold liquids.

Scientific Perspectives on Cognitive and Cellular Protection

To present the extraordinary, natural properties of this synergistic blend with scientific precision, modern research focuses entirely on the native spectrum of the mushroom biopolymers. Research into these powerful functional mushrooms delivers fascinating insights into cellular biochemistry:

- **Focus on Nootropic & Adaptogenic Properties:** In international natural compound research, species like Lion's Mane and Reishi are at the center of studies analyzing the influence of their specific active components on mental clarity, cognitive endurance, and stress adaptation.
- **Cellular Parameters:** The concentrated compounds within the multi-mushroom extract are actively investigated in cell biology models for their unique nutritional properties and their role in complementing targeted high-performance lifestyles.
- **Holistic Support & Botanical Defense:** The mushroom-specific beta-glucans serve as a premium natural matrix. They are highly valued in mycology for their capacity to functionally support targeted wellness lifestyles, nutritionally complement cellular well-being, and support the body's natural defense mechanisms as part of a balanced diet.

Drops and Sprays

Pure Quality – The Gentle Wisdom of Nature for the Little Ones.

Liquid Nutraceuticals – The Evolution of Direct Cellular Absorption

Advanced nutritional research demonstrates that the efficacy of an active compound depends crucially on its physical delivery system. Our Drops & Sprays category represents the absolute vanguard of liquid supplementation. By moving away from solid capsule frameworks, these sophisticated formulations offer an efficient, reliable, and convenient integration of essential nutrients and botanical extracts into a dynamic, health-conscious lifestyle.

The Purity of Liquid Craftsmanship

At FloraSan, liquid application means an uncompromising concentration on what truly matters. Our drops and sprays rely on ultra-pure carrier mediums that provide uniform distribution and maximum stability of the active compounds. By strictly avoiding artificial flavors, synthetic sweeteners, or chemical preservatives, we safeguard the absolute molecular integrity of the ingredients. Bottled in premium glass, these liquid nutraceuticals meet the highest clean-label standards for safe daily performance.

The Heritage of Botanical Refreshment

Historically, liquid essences and elixirs have been valued for centuries as the most refined method to render the vital forces of nature easily bioavailable. FloraSan continues this deep-rooted legacy, transforming it through the lens of modern biochemistry. We blend traditional botanical treasures and essential micronutrients into ready-to-use liquid systems, providing a highly efficient alternative to traditional delivery methods that comfortably supports the organism as part of your daily routine.

The Principles of Pure Liquid Vitality

Our approach is defined by three fundamental core principles that support the functional quality with every single spray and drop:

- **Convenient Oral Application:** Liquid applications allow for a highly efficient and pleasant uptake of active ingredients. This pathway offers a practical option for individuals looking for an easy-to-use alternative to traditional capsules, enabling nutrients to complement the daily diet with smooth convenience.
- **Fluid-Synergistic Solubility:** True efficacy comes from molecular homogeneity. Our formulations utilize advanced dissolution processes to anchor even highly complex botanical compounds into stable, highly bioavailable liquid matrices without requiring any chemical emulsifiers.
- **Precise & Flexible Customization:** The liquid delivery format offers unmatched flexibility for daily life. Whether finely atomized as an oral spray for on-the-go use or precisely measured via a dropper—our drops and sprays allow for an individual, needs-based adjustment of nutrient intake.

Zinc

ZINC LIPOSOMAL MICRONUTRIENTS LIQUID NUTRACEUTICALS

Ingredients:

Purified water, sodium-L-ascorbate, sunflower lecithin (emulsifier), steviol glycosides (sweetener), glycerol (humectant), L-ascorbic acid, xanthan gum (thickener), mango flavour (flavouring), potassium sorbate (preservative), alpha-tocopherol (antioxidant).

nutritional values	10 Sprays	NRV%*
Zinc	250 mg	250
Vitamin B5	10 mg	167

NRV: Reference value according to the EU Food Information Regulation

Recommended daily dosage

5 sprays 2x day. Spray under you tongue or on the inside of your cheek

Zinc – The Liposomal Cellular Powerhouse

The Biological Evolution of Micronutrient Absorption

In modern nutrition, optimizing cellular bioavailability is the ultimate goal. Our liquid Zinc formulation represents the technological vanguard of micronutrient delivery. By embedding the nutrients within an advanced liposomal matrix and pairing them with essential co-factors, this system supports the body's natural nutrient utilization. The result is an ultra-pure, liquid formulation featuring a refreshing mango flavor, engineered specifically for efficient, high-quality, and reliable nutrient density to fuel a demanding lifestyle.

The Technological Core Feature: Liposomal Matrix & Sublingual Delivery

The defining difference between our formulation and conventional zinc tablets lies in the physical structure of the spray. The bioactive nutrients are encapsulated within microscopic liposomes made from pure sunflower lecithin. This lipid bilayer mimics the architecture of human cell membranes, shielding the sensitive nutrients from gastric degradation and allowing an efficient, highly practical absorption via the oral pathway. This pathway allows the vital molecules to complement the daily diet smoothly and effectively, providing an advanced alternative that avoids traditional gastrointestinal digestion delays.

Synergistic Formulation with Vitamins C & B5

The biological efficacy of our Zinc spray relies heavily on the precise synchronization of its co-factors. The included Vitamin C (partially sourced as stomach-friendly sodium-L-ascorbate) acts as a valuable nutritional partner to complement the cellular matrix while reinforcing the body's natural antioxidant defense. Complemented by Vitamin B5 (Pantothenic Acid), this holo-synergistic liquid matrix supports essential metabolic functions and contributes to normal psychological and cognitive balance.

Scientifically Validated Support for Immunity & Cognition

The combination of highly bioavailable Zinc, Vitamin C, and Vitamin B5 delivers a comprehensive spectrum of officially approved, scientifically validated health benefits (EFSA claims) for your body:

- **Immune Defense & Cellular Protection:** Zinc and Vitamin C provenly contribute to the normal function of the immune system and play an essential role in protecting cells from oxidative stress.
- **Mental Performance & Cognition:** Vitamin B5 (Pantothenic Acid) contributes to normal mental performance, while Zinc supports normal cognitive function—the perfect synergy for mental agility and daily focus.
- **Energy Yield & Fatigue Reduction:** Vitamin C and Vitamin B5 actively contribute to a normal energy-yielding metabolism and aid in the reduction of tiredness and fatigue.
- **Cell Division & Metabolic Homeostasis:** Zinc plays a central role in the process of cell division and contributes to normal carbohydrate, fatty acid, and macronutrient metabolism, as well as normal protein synthesis.

FloraSan

Iron

IRON LIPOSOMAL MICRONUTRIENTS LIQUID NUTRACEUTICALS

Ingredients:

Purified water, glycerol (humectant), xylitol (sweetener), ferrous gluconate, ferric ammonium citrate, citric acid (acidity regulator), natural blackcurrant flavour, potassium sorbate (preservative).

nutritional values	10 Sprays	NRV%*
Iron	250 mg	250
Vitamin B5	10 mg	167

NRV: Reference value according to the EU Food Information Regulation

Recommended daily dosage

5 sprays 2x day. Spray under you tongue or on the inside of your cheek

Content:  30ml

200 Sprays - 5 sprays 2x day

Iron – The Liposomal Micronutrient Spray

The Biological Evolution of Iron Supplementation

In modern nutritional science, iron remains one of the most challenging micronutrients regarding systemic absorption. Conventional iron tablets frequently cause gastrointestinal discomfort and exhibit poor bioavailability. Our liquid Liposomal Iron spray represents a milestone in nutrient delivery efficiency. By combining two highly compatible iron forms—ferrous gluconate and ferric ammonium citrate—within an advanced liposomal matrix, we offer an exceptionally stomach-friendly formula with a natural, crisp blackcurrant flavor.

The Technological Core Feature: Liposomal Matrix & Sublingual Delivery

The defining advantage of our formulation lies in the microscopic encapsulation of the iron particles. The iron ions are shielded by a protective liposomal layer that mirrors the lipid architecture of human cell membranes. This biochemical barrier protects the sensitive iron compounds from reacting with gastric juices, preventing common mucosal irritation. Instead, the spray architecture enables an efficient, highly practical absorption via the oral pathway, allowing the vital molecules to complement the daily diet effectively and smoothly without traditional gastrointestinal delays.

Optimized Configuration for Cellular Oxygenation

The biological necessity of iron is fundamentally tied to the cellular respiratory chain. Through the precise orchestration of both ferrous and ferric compounds within this liquid carrier system, the systemic transport and cellular utilization of the mineral are maximized. This advanced fluid deployment provides reliable nutritional support, ensuring that the iron ions are functionally available to contribute to normal hemoglobin formation and a normal energy-yielding metabolism.

Scientifically Validated Support for Energy & Blood Production

Our liquid iron preparation delivers a precise spectrum of officially approved, scientifically validated health benefits (EFSA claims) for your body:

- **Blood Production & Oxygen Transport:** Iron provenly contributes to the normal formation of red blood cells and hemoglobin, as well as the normal transport of oxygen throughout the body.
- **Fatigue Reduction:** Iron provides a scientifically confirmed contribution to the reduction of tiredness and fatigue, supporting the organism during demanding physical or mental daily routines.
- **Energy Metabolism & Cognition:** Iron actively contributes to a normal energy-yielding metabolism and supports normal cognitive function—essential for maintaining normal cognitive development and focus.
- **Immune Defense & Cell Division:** This crucial trace mineral supports the normal function of the immune system and plays a central role in the biological process of cell division.

D 4000 LIPOSOMAL MICRONUTRIENTS LIQUID NUTRACEUTICALS

Ingredients:

Purified water, glycerol, xylitol (sweetener), olive oil, cholecalciferol (vitamin D3), arabic gum (stabilizer), sunflower lecithin (emulsifier), potassium sorbate (preservative), citric acid (acidity regulator), xanthan gum (stabilizer), cornmint essential oil (*Mentha arvensis*).

nutritional values

Vitamin D3 (cholecalciferol)

1 Spray

100 µg
(4000 IU)

NRV: Reference value according to the EU Food Information Regulation

Recommended daily dosage

1 spray a day. Spray under you tongue or on the inside of your cheek

Content:  30ml

200 Sprays - 1 spray daily

D 4000 – The Liposomal Sun Vitamin

The Biological Evolution of Vitamin D Delivery

Vitamin D3 holds an absolute exceptional status within the human organism, acting biochemically as a prohormone rather than a conventional vitamin. Because endogenous synthesis via the skin relies heavily on seasonal UV radiation, precise nutritional delivery is essential in modern, indoor lifestyles. Our liquid D 4000 spray represents the technological vanguard of micronutrient administration. By embedding this fat-soluble vitamin into an advanced liposomal matrix based on premium olive oil and infusing it with crisp commint essential oil, we deliver a highly efficient, high-dose daily asset.

The Technological Core Feature: Liposomal Matrix & Sublingual Delivery

Since Vitamin D3 is inherently fat-soluble, its absorption within a water-based environment like the gastrointestinal tract presents a physiological hurdle. The defining advantage of our spray lies in its microscopic encapsulation framework. The D3 molecules are securely locked within liposomes made from pure sunflower lecithin. This architecture shields the vitamin and enables an efficient, highly practical absorption via the oral pathway, allowing the vital molecules to complement the daily diet effectively and smoothly as an advanced alternative to traditional solid formulations.

Holo-Synergistic Formulation with Native Olive Oil

The biological efficacy of our D 4000 formulation is optimized by the strategic choice of its carrier medium. Premium olive oil acts as a natural lipophilic partner, stabilizing the cholecalciferol while supporting efficient nutrient availability. The fine atomization of the spray ensures that the bioactive lipid droplets distribute evenly across the mucosal surfaces, providing an irritation-free and physiologically balanced delivery to support your daily wellness routine.

Scientifically Validated Support for Immunity & Bone Structure

Our high-potency liquid Vitamin D3 formulation delivers a robust spectrum of officially approved, scientifically validated health benefits (EFSA claims) for your body:

- **Immune Defense & Nutritional Support:** Vitamin D provenly contributes to the normal function of the immune system.
- **Bone Density & Muscle Function:** The vitamin provides a scientifically confirmed contribution to the maintenance of normal bones and normal muscle function—essential for daily physical well-being.
- **Dental Integrity & Calcium Homeostasis:** Vitamin D contributes to the maintenance of normal teeth and provenly aids in the normal absorption, utilization, and regulation of calcium and phosphorus levels in the blood.
- **Cell Division Function:** This powerful prohormone has a function in the biological process of cell division.

FloraSan Beauty

BEAUTY LIQUID NUTRACEUTICALS

Ingredients:

Purified water, sodium L-ascorbate, xylitol (sweetener), lemon juice concentrate, L-ascorbic acid, natural blackcurrant flavour, potassium sorbate (preservative), biotin, sodium selenate.

nutritional values	1 Spray	NRV%*
Biotin	500 µg	100
Selenium	200 µg	363,0
Vitamin C	200 mg	250

NRV: Reference value according to the EU Food Information Regulation

Recommended daily dosage

5 spray a day. Spray under you tongue or on the inside of your cheek

Content: e 30ml

200 Sprays - 5 spray daily

Beauty – The Liposomal Nutrient Spray

The Biological Evolution of Cellular Beauty

True aesthetic integrity and tissue resilience originate deep within the cellular layers of the organism. Our liquid Beauty spray represents the technological vanguard of modern nutri-cosmetics. By embedding high-dose Biotin, essential Selenium, and potent Vitamin C into an advanced liquid matrix, this formulation supports the body's natural nutrient utilization. Infused with natural lemon juice and crisp blackcurrant flavor, this holo-synergistic formula provides a deeply effective nutrient supply tailored to fuel the dynamic performance of skin, hair, and nails.

The Technological Core Feature: Optimized Fluid Matrix & Sublingual Delivery

The defining advantage of our Beauty spray lies within its physical delivery architecture. Instead of undergoing prolonged degradation within the gastrointestinal tract, the fine atomization enables an efficient, highly practical absorption via the oral pathway. Thanks to this advanced liquid system, the bioactive micronutrients complement the daily diet effectively and smoothly, providing excellent biological availability right where the botanical and nutritional components can support your daily beauty routine.

The Synergistic Triad for Collagen & Keratin Preservation

The efficacy of this formulation relies entirely on the precise biochemical orchestration of its three core assets. Vitamin C acts as an indispensable co-factor in endogenous collagen synthesis, which builds the structural framework of the connective tissue. Simultaneously, its interplay with Selenium shields vulnerable cellular structures from oxidative degradation. Meanwhile, Biotin integrates into protein metabolism, nutritionally supporting the maintenance of a resilient skin barrier and strong hair fibers.

Scientifically Validated Support for Tissues, Skin & Hair

The synergistic combination of Biotin, Selenium, and Vitamin C delivers a robust spectrum of officially approved, scientifically validated health benefits (EFSA claims) for your body:

- **Maintenance of Hair & Skin:** Biotin and Selenium provenly contribute to the maintenance of normal hair, while Biotin further provides a validated contribution to the maintenance of normal skin and mucous membranes.
- **Preservation of Nail Integrity:** The crucial trace mineral Selenium actively contributes to the maintenance of normal nails, supporting the body's natural maintenance systems.
- **Collagen Synthesis & Connective Tissue:** Vitamin C contributes to normal collagen formation for the normal function of the skin, blood vessels, and gums.
- **Antioxidant Cellular Shield:** Vitamin C and Selenium provenly contribute to protecting cells from oxidative stress induced by environmental factors and free radicals.
- **Energy Yield & Fatigue Reduction:** Vitamin C supports a normal energy-yielding metabolism and aids in the reduction of tiredness and fatigue.

FloraSan

Sleep Aid

Cannabis

SLEEP AID CANNABIS LIQUID NUTRACEUTICALS

Ingredients:

Purified water, glycerol (thickener), melatonin, citric acid (acidity regulator), steviol glycosides (sweetener), potassium sorbate (preservative), organic cannabis oil, xanthan gum (emulsifier), alpha-tocopherol (antioxidant), essential oils: peppermint (*Mentha Arvensis*) and orange (*Citrus Sinensis*).

nutritional values	1 Spray	NRV%*
Melatonin	1 mg	--

NRV: Reference value according to the EU Food Information Regulation

Recommended daily dosage

1 spray a day. Spray under you tongue or on the inside of your cheek

Sleep Fluid Cannabis – The Advanced Nighttime Formula

The Biological Evolution of Nocturnal Regeneration

Restorative sleep forms the core biochemical foundation for daily human vitality. Our liquid Sleep Fluid Cannabis spray represents a milestone in evening nutraceutical design. By precisely synchronizing the body's natural sleep-signaling messenger, Melatonin, with the soothing properties of organic cannabis oil and the aromatic essences of peppermint and orange, we have engineered a highly bioavailable fluid system. It integrates seamlessly into the nightly wind-down routine of modern, high-performance individuals facing intense mental demands.

The Technological Core Feature: Fluid Emulsion & Rapid Sublingual Delivery

The defining advantage of our spray format over conventional sleep tablets lies within its direct physical delivery architecture. Utilizing natural xanthan gum, we successfully stabilize lipophilic organic cannabis oil within a water-based matrix. Upon application, this liquid emulsion is finely atomized, enabling an efficient, highly practical absorption via the oral pathway. This pathway allows Melatonin to complement the nightly routine effectively and smoothly, providing an advanced alternative to traditional solid formulations as the body transitions into its rest phase.

Synergistic Integration of Melatonin and Botanical Lipids

The efficacy of this formulation relies on the harmonious interplay of its active components. Melatonin operates as a highly researched compound closely tied to the body's internal circadian clock. Embedded within the protective lipid structure of organic cannabis oil and complemented by the calming terpene profiles of orange and peppermint essential oils, it creates a powerful, holo-synergistic effect. This combination complements targeted dietary parameters while simultaneously providing pleasant sensory cues of relaxation and tranquility via taste and smell.

Scientifically Validated Support for Sleep Onset

Our liquid Sleep Fluid Cannabis preparation delivers a precise spectrum of officially approved, scientifically validated health benefits (EFSA claims) for your body:

- **Reduction of Sleep Onset Latency:** Melatonin contributes to the reduction of time taken to fall asleep. This positive effect is obtained by consuming 1 mg of melatonin (exactly 1 spray) close to bedtime.
- **Alleviation of Jet Lag Sensations:** Melatonin contributes to mitigating the subjective feelings of jet lag, making it an essential asset for international travelers seeking to support their biological rhythm.
- **Nocturnal Cellular Protection:** The included alpha-tocopherol (Vitamin E) functions within the fluid matrix to contribute to the protection of cells from oxidative stress during the nightly rest phase.

Sleep Aid strong

GOOD NIGHT

SLEEP AID CANNABIS LIQUID NUTRACEUTICALS

Ingredients:

Purified water, glycerol (thickener), melatonin, citric acid (acidity regulator), steviol glycosides (sweetener), potassium sorbate (preservative), xanthan gum (emulsifier), alpha-tocopherol (antioxidant), essential oils: peppermint (*Mentha Arvensis*) and orange (*Citrus Sinensis*).

1 spray a day. Spray under your tongue or on the inside of your cheek

Sleep Aid strong – The High-Potency Fluid Night Formula

When Standard Relaxation Falls Short

There are nights when the mind is so heavily wired that gentle evening routines simply fail to work. Whether facing intense business operations, chronic overstimulation, or extreme time zone shifts: when the circadian rhythm requires targeted support, the organism requires a clear, unmistakable signal. Our Sleep Fluid strong complex has been engineered precisely for these acute scenarios. As a high-potency, intensive preparation delivering a substantial 1.95 mg of Melatonin per single application, it provides advanced nutritional support required to help prepare the body for a restful night.

The Technological Core Feature: Immediate Sublingual Flooding

With the "strong" edition, time is the critical variable. When lying awake at night, you cannot afford to wait for a tablet to slowly degrade in the stomach. The fluid application system atomizes the highly concentrated 1.95 mg of Melatonin into microscopic droplets designed for efficient, highly practical absorption via the oral pathway. This delivery architecture allows the active compound to complement the nightly routine effectively and smoothly, providing a highly bioavailable fluid alternative that avoids traditional gastrointestinal digestion delays as the body transitions into its rest phase.

Acute Matrix for a Decisive Mental Cut

This spray is a highly efficient nighttime asset developed to act as a functional addition to your evening routine. While the high-dose Melatonin efficiently supports the body's internal biological clock to transition into rest mode, the blend of peppermint and orange essential oils delivers a sensory cut. The crisp, intense-aromatic profile sends pleasant sensory cues through the gustatory pathways, marking the definitive end of the active daytime phase.

Scientifically Validated Support for Maximum Sleep Onset Efficacy

Our high-potency liquid Sleep Fluid strong preparation provides a sharp, officially approved performance profile according to strict EFSA guidelines for high-stress periods:

- **Maximized Reduction of Sleep Onset Latency:** Melatonin stands as the scientifically verified ingredient for reducing the time taken to fall asleep. This powerful effect is optimally triggered by the targeted delivery of 1.95 mg of Melatonin (exactly 1 spray) immediately before bedtime.
- **Decisive Jet Lag Alleviation:** For international performers and frequent travelers, Melatonin is the ideal compound to complement targeted travel routines. It provently contributes to mitigating the subjective feelings of jet lag, supporting the biological adaptation within the new time zone.
- **Cellular Protection During Recovery:** The integrated alpha-tocopherol (Vitamin E) stabilizes the delicate essential components inside the bottle and provides a scientifically confirmed contribution to protecting cellular structures from oxidative stress during intensive rest phases.

FloraSan B - Complex

B - COMPLEX LIQUID NUTRACEUTICALS

Ingredients:

steviol glycosides (sweetener), purified water, natural aroma menthol, vitamin B1 (thiamine hydrochloride), vitamin B3 (nicotinamide), natural aroma spearmint (*Mentha spicata*), vitamin B5 (D-calcium pantothenate), vitamin B12 (methylcobalamin), vitamin B2 (Riboflavin 5'-Phosphate Sodium), vitamin B6 (pyridoxine hydrochloride), citric acid (acidity regulator), potassium sorbate (preservative). Suitable for vegans.

200 Sprays - 3 spray daily

B-Complex – The Liposomal Micronutrient Network

The Biological Evolution of Mitochondrial Coenzymes

Within human biochemistry, the vitamins of the B-complex do not function as isolated entities, but rather as an intrinsically linked, holo-synergistic network of metabolic catalysis. They serve as the fundamental ignition keys for cellular energy yield and neurotransmitter synthesis. Our liquid B-Complex spray represents the technological vanguard of systemic micronutrient delivery. By combining highly bioavailable B-forms—such as directly active coenzymes (B1, B3, B6, B12) within a fluid carrier system infused with crisp spearmint and menthol, it provides an advanced daily asset to support vital metabolic functions.

The Technological Core Feature: Fluid Optimization & Rapid Sublingual Delivery

The defining advantage of this B-Complex formulation over conventional high-dose tablets lies within its direct fluid delivery format. Many B-vitamins can be sensitive during digestion. The fine atomization of this spray allows the pure, dissolved micronutrients to coat the oral mucosa smoothly. This practical delivery format enables an efficient and highly convenient nutrient uptake, allowing the bioactive molecules to complement the daily diet effectively and support your daily routine without traditional digestive delays.

Synergistic Synchronization of the Cellular Respiratory Chain

The systemic efficacy of this formulation relies entirely on the biochemical synchronization of its co-factors. While Thiamine (B1) and Niacin (B3) contribute to normal carbohydrate utilization and baseline energy yielding, Riboflavin (B2) supports the normal transport and metabolism of iron within the respiratory chain. Supported by Pantothenic Acid (B5) and Pyridoxine (B6) for hormonal and amino acid synthesis, alongside high-potency Methylcobalamin (B12) for cellular methylation cycles, this fluid matrix reliably supports essential physiological functions to help maintain daily vitality.

Scientifically Validated Support for Energy, Nerves & Mind

The synergistic matrix of six essential B-vitamins delivers a comprehensive spectrum of officially approved, scientifically validated health benefits (EFSA claims) for daily performance:

- **Nervous System & Psychological Well-being:** Vitamins B1, B2, B3, B6, and B12 provenly contribute to the normal functioning of the nervous system, while B1, B3, B6, and B12 further support normal psychological function.
- **Energy Yield & Fatigue Reduction:** All six included B-vitamins (B1, B2, B3, B5, B6, B12) actively contribute to a normal energy-yielding metabolism. Furthermore, B2, B3, B5, B6, and B12 contribute to the reduction of tiredness and fatigue.
- **Mental Performance Limits:** Vitamin B5 (Pantothenic Acid) contributes to normal mental performance and the normal synthesis and metabolism of specific steroid hormones, vitamin D, and neurotransmitters.
- **Cellular Defense & Vision Integrity:** Vitamin B2 provenly contributes to protecting cells from oxidative stress and supports the maintenance of normal vision.

FloraSan

KSM-66

ANTI-STRESS

KSM-66® Anti-Stress – The Hydrocolloidal Adaptogen Gel

The Biological Evolution of Stress Resilience

In a high-velocity modern environment defined by intense mental and cognitive demands, supporting the body's natural baseline defense and nutritional balance is a critical pillar of daily well-being. Our KSM-66 Balance gel represents the technological vanguard of adaptogenic botanical supplementation. By embedding the world's leading, clinically validated Ashwagandha root extract, KSM-66®, within a highly viscous, protective gel matrix—synergistically paired with premium lemon balm extract, essential lavender oil, and the vital neural co-factor Vitamin B6—we deliver a deeply supportive asset for the nervous system during demanding lifestyles.

The Technological Core Feature: Hydrocolloidal Matrix & Variable Delivery

The defining characteristic of this formulation lies within the physical engineering of its gel-like consistency. The macromolecular network composed of natural xanthan gum and vegetable glycerol encapsulates the highly sensitive, lipophilic withanolides of Ashwagandha and the volatile terpenes of lavender like a protective shield. This viscous structure possesses unique mucoadhesive properties, allowing it to coat the oral mucosal surfaces gently and maximize contact time. Alternatively, due to its hydrocolloidal nature, the gel can be suspended completely without residue in a glass of water. This allows for a flexible, fluid intake without affecting the excellent gastrointestinal tolerance or the bioavailability of the bioactive botanical compounds.

KSM-66 ANTI-STRESS LIQUID NUTRACEUTICALS

Ingredients: Purified water, glycerol (humectant), lemon balm leaf extract (*Melissa officinalis*), KSM-66 Ashwagandha root extract (*Withania somnifera*), olive oil, xanthan gum (stabilizer), citric acid (acidity regulator), potassium sorbate (preservative), vitamin B6 (pyridoxine hydrochlorid), lavender essential oil (*Lavandula angustifolia*). Suitable for vegans.

nutritional values	1 Sprays	NRV%*
KSM-66 Ashwagandha root extract (<i>Withania somnifera</i>)	62,5 mg	--
lemon balm leaf extract (<i>Melissa officinalis</i>),	75 mg	--
vitamin B6 (pyridoxine hydrochloride)	0,375 mg	26,8

NRV: Reference value according to the EU Food Information Regulation

Recommended daily dosage

Take 1 portion (3 single doses) daily shortly before a meal (ideally 15 minutes before on an empty stomach). The gel-like mass can be applied directly into the mouth, or stirred into a glass of water for easier consumption and swallowed.

Content: e 50ml
50 Sprays - 1 - 4 sprays/day

Holo-Synergistic Balance for the Neuro-Endocrine Axis

The systemic efficacy of this gel relies on the precise biochemical synchronization of phytochemistry and functional micronutrient delivery. While Ashwagandha operates as a classic adaptogen, reinforcing the body's natural baseline defense against emotional and physical stressors, the soothing properties of lemon balm help support overall relaxation and mental clarity. Vitamin B6 completes this vital gel matrix by functioning as an indispensable building block to contribute to the normal functioning of the nervous system and supporting healthy psychological parameters to maintain overall daily balance.

Scientifically Validated Support for the Nervous System & Cognitive Peace

The synergistic integration of premium botanical extracts and highly bioavailable Vitamin B6 delivers a precise, officially approved spectrum of health benefits according to strict EFSA regulations:

- **Regulation of Hormonal Activity:** Vitamin B6 provenly contributes to the regulation of hormonal activity—a critical mechanism for keeping the body in homeostatic balance.
- **Nervous System & Psychological Balance:** The vitamin provides a scientifically confirmed contribution to the normal functioning of the nervous system and supports healthy psychological well-being.
- **Energy Yield & Fatigue Counteraction:** Vitamin B6 supports a normal energy-yielding metabolism and actively contributes to the reduction of tiredness and fatigue during demanding lifecycles.
- **Metabolic Pathways:** It contributes to normal cysteine synthesis, normal homocysteine metabolism, and normal protein and glycogen utilization, supporting essential daily metabolic functions.

Vitamin C + D

Liposomal

VITAMIN C + D LIPOSOMAL MICRONUTRIENTS LIQUID NUTRACEUTICALS

Ingredients:

purified water, sodium-L-ascorbate, lecithin (emulsifier), steviol glycosides (sweetener), glycerol (humectant), L-ascorbic acid, xanthan gum (thickener), mango flavour (flavouring), potassium sorbate (preservative), vitamin D3 (cholecalciferol), alpha-tocopherol (antioxidant).

- Suitable for vegetarians.

nutritional values	3 Sprays	NRV%*
Vitamin C liposomal	1000mg	1250
Vitamin D3 75µg (3000 IU) (1500%*)	75µg	1500

NRV: Reference value according to the EU Food Information Regulation

Recommended daily dosage

Take 1 portion (3 single doses) daily shortly before a meal (ideally 15 minutes before on an empty stomach). The gel-like mass can be applied directly into the mouth, or stirred into a glass of water for easier consumption and swallowed.

Content: e 50ml
50 Sprays - 1 - 4 sprays/day

Vitamin C + D – The Liposomal Nutrient Formula

The Biological Evolution of Cellular Defense

Vitamins C and D3 represent two of the most heavily researched and fundamental pillars of human immunobiology. While the water-soluble Vitamin C acts as a valuable antioxidant within the body, the fat-soluble Vitamin D3 operates as a crucial prohormone studied for its multiple vital roles in overall health. Our liquid Vitamin C + D Liposomal spray merges these two essential micronutrients into an advanced fluid matrix infused with a refreshing mango flavor, delivering an efficient performance profile designed to support everyday physiological resilience.

The Technological Core Feature: Liposomal Dual-Layer Matrix

The primary biochemical challenge of this formula lies within its opposing physical properties. Vitamin C is inherently water-soluble, while Vitamin D3 is strictly fat-soluble. The technological solution is achieved through advanced liposomal encapsulation utilizing pure lecithin. These microscopic liposomes mimic endogenous cellular membranes, enclosing the water-soluble Vitamin C within their aqueous core while embedding the fat-soluble Vitamin D3 securely inside their lipid bilayer. This framework shields both vitamins and enables an efficient, highly practical absorption via the oral pathway, allowing the vital molecules to complement the daily diet effectively and smoothly.

Holo-Synergistic Defense Framework

The systemic efficacy of this liposomal complex relies entirely on the biological intersection of its active assets. Nutritional balance requires a synchronized response. Vitamin C contributes to the protection of cells from oxidative stress to preserve white blood cell integrity, while Vitamin D3 contributes to the normal function of the immune system. The integration of alpha-tocopherol (Vitamin E) rounds out this antioxidant network, stabilizing the sensitive lipid structure of the liposomes against oxidation and supporting reliable systemic availability.

Scientifically Validated Support for Immunity & Structural Performance

The high-potency combination of Vitamin C and D3 delivers a comprehensive spectrum of officially approved, scientifically validated health benefits (EFSA claims) to sustain human vitality:

- **Immune Defense Architecture:** Both Vitamin C and Vitamin D provently contribute to the normal function of the immune system (including during and after intense physical exercise for Vitamin C).
- **Antioxidant Cellular Shield:** Vitamin C provides a scientifically confirmed contribution to protecting cells from oxidative stress induced by environmental factors.
- **Structural Integrity & Muscle Support:** Vitamin D contributes to the maintenance of normal bones, normal teeth, and normal muscle function, while assisting with regular calcium utilization.
- **Energy Homeostasis & Neural Support:** Vitamin C supports a normal energy-yielding metabolism, a healthy nervous system, and contributes to the reduction of tiredness and fatigue.

Vitamin C
Liposomal

VITAMIN C LIPOSOMAL MICRONUTRIENTS LIQUID NUTRACEUTICALS

Ingredients:

Purified water, sodium-L-ascorbate, sunflower lecithin (emulsifier), steviol glycosides (sweetener), glycerol (humectant), L-ascorbic acid, xanthan gum (thickener), mango flavour (flavouring), potassium sorbate (preservative), alpha-tocopherol (antioxidant).

50 Sprays - 1 - 4 sprays/day

Vitamin C – The Liposomal Nutrient Spray

The Biological Evolution of Ascorbic Acid Intake

Vitamin C (Ascorbic Acid) stands as one of the most rigorously researched and fundamental micronutrients within human physiology. Because the human organism lost the evolutionary capacity for endogenous Vitamin C synthesis, unlike nearly all other animal species, it relies entirely on a continuous and robust nutritional supply. Our liquid Vitamin C Liposomal spray represents the technological vanguard of cellular nutrient delivery. By encapsulating high-purity ascorbate molecules within a protective lecithin fluid matrix infused with a crisp mango flavor, we deliver a high-performance daily asset to support your daily wellness routine.

The Technological Core Feature: Liposomal Phospholipid Encapsulation

Conventional Vitamin C tablets or powders can sometimes present absorption challenges within the gastrointestinal tract. The defining advantage of our spray format lies in its microscopic physical engineering. The Vitamin C molecules are securely locked inside liposomes made from pure sunflower lecithin. These lipid bilayer vesicles closely mimic endogenous cellular membranes, enabling an efficient, highly practical absorption via the oral pathway. This advanced delivery alternative allows the active compounds to complement the daily diet effectively and smoothly without traditional digestive delays.

Holo-Synergistic Defense Framework

The biological integrity and stability of our liposomal formula is optimized by an integrated biochemical defense system. Since Vitamin C in liquid forms is highly sensitive to oxidation, the liposomal membrane frame shields the active core from environmental degradation. The integrated alpha-tocopherol (Vitamin E) acts as a lipophilic partner within this fluid environment, contributing to the protection of cells from oxidative stress at the liposomal lipid boundaries while the core Vitamin C regenerates the system. This synergistic loop supports premium viability and overall nutritional performance.

Scientifically Validated Support for Immunity & Structural Integrity

Our high-potency liquid Vitamin C formulation delivers a comprehensive spectrum of officially approved, scientifically validated health benefits (EFSA claims) to fuel human vitality:

- **Immune Defense Architecture:** Vitamin C provenly contributes to the normal function of the immune system, including during and after intense physical exercise.
- **Collagen Synthesis & Tissue Matrix:** The vitamin provides a scientifically confirmed contribution to normal collagen formation, supporting the normal function of the skin, blood vessels, bones, gums, and teeth.
- **Antioxidant Cellular Shield:** Vitamin C contributes to the protection of cells from oxidative stress induced by free radicals.
- **Energy Homeostasis & Vitality:** It supports a normal energy-yielding metabolism, contributes to the normal functioning of the nervous system, and contributes to the reduction of tiredness and fatigue.
- **Iron Bioavailability:** Vitamin C scientifically increases the absorption and utilization of non-heme iron from dietary sources.

Premium Shots - Liquid Nutraceuticals

Pure Performance – The Evolution of Advanced Liquid Nutrient Delivery

The Purity of Liquid Galenics

At FloraSan, product optimization means overcoming the limits of traditional supplements. By replacing solid capsules, tablets, and poorly soluble powders, our Liquid Nutraceuticals deliver all bioactive compounds in a homogeneous, fluid matrix. We utilize exclusively ultra-pure carrier mediums and organic direct juices to provide maximum stability and excellent nutrient availability. True to our strict clean-label standard, we completely avoid artificial flavors, synthetic sweeteners, or chemical preservatives—ensuring pure, unadulterated performance for your daily life.

The Heritage of Vascular Vitality

Historically, liquid essences and cold-extracted botanical juices have been valued for centuries as the most refined and pristine method to render the vital forces of nature immediately bioavailable. FloraSan continues this deep-rooted legacy, transforming it through the lens of modern biochemistry. We blend traditional botanical treasures with high-quality micronutrients to provide a highly efficient system that functionally supports daily energy, focus, and general well-being without straining the digestive pathways.

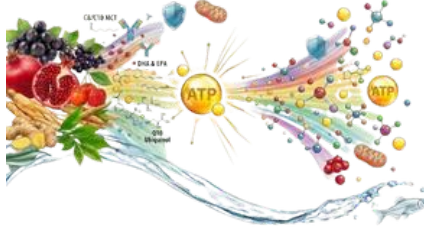

The Principles of Direct Cellular Absorption

Our approach is defined by three fundamental core principles that support the functional quality and effectiveness with every single sip:

- **Efficient Oral Intake:** Liquid application allows for a highly practical and comfortable uptake of active ingredients. This pathway provides a reliable option for individuals looking for an easy-to-use alternative to traditional capsules, enabling nutrients to complement the daily diet effectively and support your body smoothly as part of a balanced routine.
- **Holo-Synergistic Solubility:** True efficacy results from molecular homogeneity. Our formulations utilize advanced, gentle dissolution processes to anchor even highly complex botanical extracts, endogenous coenzymes, and structural proteins stably into a liquid phase—completely without requiring any chemical emulsifiers.
- **Precise & Flexible Functionality:** The liquid delivery format offers unmatched flexibility for a high-performance lifestyle. Whether deployed as a highly concentrated intensive shot or a precisely measured liquid blend, our liquid formulas allow for an individual, needs-based adjustment of nutrient intake that integrates seamlessly into a dynamic and health-conscious routine.

A highly bioavailable liquid concentrate packed with 78 premium ingredients, combining essential vitamins and chelated minerals with targeted adaptogens, bioactives, and amino acids in a nutrient-dense, water-free juice matrix.

Ingredients: Pomegranate juice concentrate, Aronia juice concentrate, Black currant juice concentrate, Elderberry juice concentrate, Carrot juice concentrate, Sweetener: Erythritol, MCT oil (C8/C10), Cherry juice concentrate, Vegetable glycerin, Algae oil (rich in DHA and EPA), Acerola juice concentrate, Magnesium bisglycinate, Magnesium threonate, Beet juice concentrate, Lemon juice concentrate, Sea buckthorn juice concentrate, Inulin/Fructooligosaccharides (sc-FOS), L-Carnitine L-tartrate, Ashwagandha extract (KSM-66), Rhodiola rosea extract, Vitamin C (L-ascorbic acid), Hydroxypropyl-beta-cyclodextrin, Panax ginseng extract, N-Acetylcysteine (NAC), Green tea extract (EGCG), Blueberry juice concentrate, Ginger juice concentrate, Potassium citrate, Calcium citrate, L-Glutamine, L-Citrulline, L-Taurine, Glycine, Milk thistle extract, Artichoke extract, Dandelion extract, Borage seed oil, Acidifier: Citric acid, Grape seed extract (OPC), Coenzyme Q10 (Ubiquinol), Alpha-lipoic acid, Curcumin-cyclodextrin complex (Cavacurmin), Hyaluronic acid, L-Cysteine, L-Lysine HCl, Black cumin oil, Soy lecithin, natural berry-cherry flavor, Choline bitartrate, Iron bisglycinate, Zinc bisglycinate, Resveratrol, Quercetin, Stabilizer: Xanthan gum, Royal jelly (lyophilized), Propolis extract, Vitamin E (D-alpha-tocopherol), Sweetener: Steviol glycosides (from stevia, Reb-A 97%), Manganese bisglycinate, Lutein, Preservative: Potassium sorbate, Copper bisglycinate, Boron citrate, Zeaxanthin, Astaxanthin, Black pepper extract (Piperine/Bioperine), Rosemary extract, Vitamin A (Beta-carotene), Folic acid (as microencapsulated 5-methyltetrahydrofolate), Vitamin D3 (Cholecalciferol), Vitamin B12 (as microencapsulated methylcobalamin), Vitamin K2 (Menaquinone-7 / MK-7), Niacin (Nicotinamide), Pantothenic acid (Calcium D-pantothenate), Vitamin B6 (Pyridoxal-5-phosphate), Vitamin B2 (Riboflavin), Vitamin B1 (Thiamine hydrochloride), Biotin (D-biotin), Sodium selenite (or Selenomethionine), Potassium iodide, Chromium picolinate.

The Biological Evolution of Cellular Micronutrient Supply

The human organism requires a continuous and precisely balanced supply of essential cofactors to maintain its biochemical homeostasis. In modern daily life, altered agricultural structures or prolonged stress frequently lead to an increased demand for micronutrients—a shift occurring at a pace that biological evolution cannot match. Our Daily Multi Shot is engineered as a technological foundation to provide the body with a biologically comprehensive daily nutrient profile. By delivering high-potency vitamins, chelated trace elements, and bioactive coenzymes, it supports cellular integrity and mitochondrial ATP production on a systemic level.

The Technological Core Feature: Water-Free Juice Matrix and Bioavailable Nutrient Chelates

Conventional multivitamin preparations in tablet or powder form often utilize low-grade inorganic salts that exhibit poor solubility in the gastrointestinal tract and can irritate the mucosal lining. The technological advancement of the Daily Multi Shot lies in its water-free, nutrient-dense matrix of organic direct juices, including pomegranate, aronia, elderberry, and sea buckthorn. Within this liquid medium, essential minerals such as magnesium and zinc are present in highly bioavailable, organic chelated forms (as bisglycinates and threonates). These molecular structures are recognized by the body similarly to amino acids, passing through the intestinal wall without absorption bottlenecks to become immediately available to the cells. This passage is further enhanced by the inclusion of piperine (Bioperine) to maximize intestinal absorption.

The Holo-Synergistic Defense and Adaptogen Framework

The biological uniqueness of this formulation is based on the targeted molecular synergy of 78 premium ingredients, moving far beyond simple basic supplementation. The integrated system combines highly advanced botanical extracts (including Ashwagandha KSM-66, Rhodiola Rosea, Panax Ginseng, and green tea) with bioactive lipids such as MCT oil, algae oil (rich in DHA and EPA), and black cumin oil. Complemented by functional amino acids (such as L-carnitine, L-glutamine, and L-citrulline) and coenzymes like ubiquinol (Coenzyme Q10) and alpha-lipoic acid, a self-regenerating network is established. This synergistic loop protects cellular structures from oxidative stress, stabilizes the mitochondrial membrane, and holistically supports the organism in adapting to physical and mental demands.

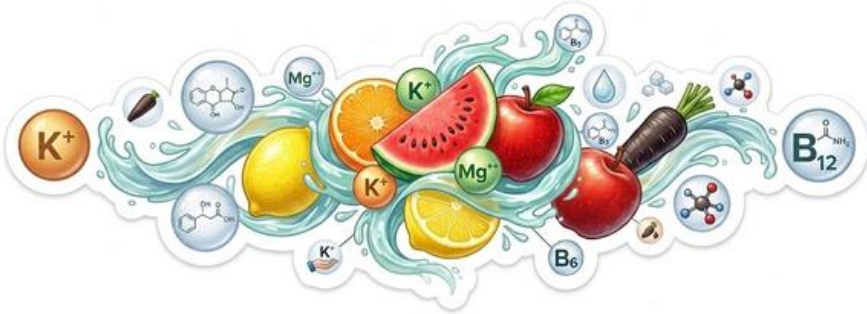

Scientifically Validated Support for Vitality & Systemic Function

Our highly concentrated all-in-one formulation delivers a comprehensive spectrum of officially approved, scientifically validated health benefits (EFSA claims) to optimize human physiology:

- Cellular Energy Production (ATP):** Vitamins B1, B2, B3, B5, B6, B12, biotin, as well as iron, manganese, copper, and iodine provenly contribute to a normal energy-yielding metabolism and the reduction of tiredness and fatigue.
- Cognitive Function & Nervous System:** Pantothenic acid (B5) supports normal mental performance; zinc and iodine contribute to normal cognitive function, while potassium and magnesium sustain normal nervous system operation.
- Immune Defense Architecture:** Vitamins A, C, D3, B6, B12, along with folic acid (5-MTHF), selenium, zinc, and copper contribute to the normal functioning of the immune system.
- Antioxidant Cellular Shielding:** Vitamin E, vitamin C, riboflavin (B2), alongside zinc, selenium, manganese, and copper contribute significantly to protecting cells from oxidative stress induced by free radicals.
- Metabolic & Homeostasis Regulation:** Chromium contributes to the maintenance of normal blood glucose levels, while choline supports normal lipid metabolism and the maintenance of normal liver function.

FloraSan

HYDRATION SHOT

HYDRATION SHOT LIQUID NUTRACEUTICALS

Ingredients:

Watermelon juice 6g, glucose 6g, concentrated lemon juice 4g, concentrated orange juice 3.4g, concentrated apple juice 3.34g, potassium 300mg, coconut water extract 250mg, sodium citrate 75mg, watermelon flavor 68.4mg, magnesium 56.25mg, black carrot concentrate 44mg, vitamin B3 (niacinamide) 8mg, vitamin B6 (pyridoxine hydrochloride) 0.7mg, vitamin B1 (thiamine mononitrate) 0.55mg, vitamin B12 1µg, water.

Hydration Shot – The Advanced Isotonic & Electrolyte Matrix

The Biological Evolution of Cellular Fluid Balance

Maintaining a balanced fluid and electrolyte status is a fundamental pillar of daily physical endurance and metabolic vitality. Our Hydration Shot represents the technological vanguard of functional liquid supplementation. By combining key electrolytes with vital B-vitamins in a precisely balanced fluid system, we deliver a high-performance daily asset to functionally complement your hydration routines during demanding physical endeavors.

The Technological Core Feature: The Bioactive Isotonization Matrix from Fruit Juices and Coconut Water

Conventional electrolyte drinks typically rely on isolated salts dissolved in plain water, which are often absorbed with a delay or cause gastrointestinal discomfort. The technological advancement of the Hydration Shot lies in its bioactive base matrix consisting of watermelon juice, concentrated lemon, orange, and apple juices, along with nutrient-dense coconut water extract. Within this natural liquid environment, the key electrolytes potassium and magnesium, as well as sodium citrate, are present in a perfectly dosed framework. Combined with a precisely balanced amount of glucose, the formulation supports optimal osmotic balance, allowing water and minerals to complement the body's natural hydration pathways effectively and smoothly.

The Holo-Synergistic Hydro & B-Vitamin Framework

The biological efficacy of this formulation is built upon the targeted synergy between hydration elements and cellular metabolic co-factors. The combination of potassium-rich watermelon juice and functional magnesium is complemented by an integrated complex of essential B-vitamins (B1 as thiamine mononitrate, B3 as niacinamide, B6 as pyridoxine hydrochloride, and B12). While the electrolytes contribute to normal muscle function and support electrolyte balance, the B-vitamins act as valuable co-factors for the normal energy-yielding metabolism. Black carrot concentrate further provides secondary plant compounds that support the stability of the fluid matrix. This synergistic loop reliably delivers essential nutrients to support the body's natural metabolic balance.

Scientifically Validated Support for Electrolyte Balance & Energy Homeostasis

This liquid hydro formulation delivers a comprehensive spectrum of officially approved, scientifically validated health benefits (EFSA claims) to optimize human physiology:

- **Electrolyte Balance & Muscle Function:** Magnesium provenly contributes to electrolyte balance, both potassium and magnesium support normal functioning of the nervous system, and both contribute to normal muscle function.
- **Energy Metabolism Activation:** Vitamins B1, B3, B6, B12, and magnesium contribute to a normal energy-yielding metabolism.
- **Reduction of Fatigue:** Magnesium alongside vitamins B3, B6, and B12 provide a scientifically confirmed contribution to the reduction of tiredness and fatigue.
- **Psychological Function & Nervous System:** Vitamins B1, B3, B6, B12, and magnesium contribute to normal psychological function and the normal functioning of the nervous system.
- **Regulation of Hormonal Activity:** Vitamin B6 contributes to the normal regulation of hormonal activity.

FloraSan

FIT ZERO SHOT

FIT ZERO SHOT LIQUID NUTRACEUTICALS

Ingredients:

Water, citric acid, magnesium (magnesium citrate), turmeric, flavor (aperol type), chromium (chromium chloride), glycosides (sweeteners), natural orange flavor, iron (ferrous fumarate), vitamin B2 (riboflavin), sucralose, vitamin B1 (thiamine mononitrate), vitamin B12 (methylcobalamin).

nutritional values	daily portion	NRV%*

Fit Zero Shot – The Advanced Metabolic & Micronutrient Matrix

The Biological Evolution of Metabolic Energy Regulation

The efficient regulation of macronutrient metabolism and the maintenance of stable blood glucose levels are core evolutionary mechanisms required to secure cellular energy supplies. In modern lifestyles, an overabundance of processed carbohydrates combined with physical or mental stress frequently leads to imbalances in glucose metabolism and cellular fatigue. Because the human organism relies on precise mitochondrial ATP synthesis, it requires specific inorganic and botanical co-factors to function optimally. Our Fit Zero Shot is engineered to provide a sugar-free, calorie-efficient synergy that supports the natural energy-yielding metabolism on a systemic level and sustains overall daily vitality.

The Technological Core Feature: Calorie-Free Liquid Matrix with Organic Mineral Carriers

Conventional sports or activation beverages typically rely on high sugar contents to simulate immediate energy, which consequently triggers severe blood glucose fluctuations. The technological design of the Fit Zero Shot utilizes a completely sugar-free liquid matrix, flavor-optimized with natural orange extract and a sophisticated aperol-type note. Essential minerals are delivered in highly bioavailable forms—magnesium as organic magnesium citrate and iron as stable ferrous fumarate. These targeted compounds provide excellent nutrient availability within the gastrointestinal tract, supporting a well-tolerated and efficient transport to functionally complement the daily diet.

The Holo-Synergistic Chromium & Botanicals Framework

The biochemical efficiency of this formulation results from the targeted molecular integration of trace elements, vitamins, and functional botanicals. The system combines bioactive turmeric extract with the essential trace element chromium (as chromium chloride) and a high-potency B-vitamin complex (B1 as thiamine mononitrate, B2 as riboflavin, and B12 as methylcobalamin). While chromium contributes to the maintenance of normal blood glucose levels, iron and the B-vitamins act as valuable nutritional co-factors within the mitochondrial respiratory chain. This interplay with the bioactive components of turmeric helps to protect cells from oxidative stress, establishing a synergistic loop that supports normal metabolic functions without nutritional burden.

Scientifically Validated Support for Metabolic Regulation & Vitality

Our liquid, sugar-free formulation delivers a comprehensive spectrum of officially approved, scientifically validated health benefits (EFSA claims) to optimize human physiology:

- **Blood Glucose Regulation:** Chromium provenly contributes to the maintenance of normal blood glucose levels.
- **Macronutrient Metabolism:** Chromium provides a scientifically confirmed contribution to normal macronutrient metabolism (carbohydrates, fats, proteins).
- **Cellular Energy Metabolism & ATP Synthesis:** Vitamins B1, B2, B12, along with magnesium and iron, contribute to a normal energy-yielding metabolism.
- **Reduction of Fatigue & Tiredness:** Magnesium, iron, and vitamins B2 and B12 contribute to the reduction of tiredness and fatigue.
- **Oxygen Transport & Red Blood Cell Formation:** Iron supports normal oxygen transport in the body as well as the normal formation of red blood cells and hemoglobin, while vitamin B12 contributes to the normal formation of normal red blood cells.

FloraSan Beauty Shot

BEAUTY SHOT LIQUID NUTRACEUTICALS

Beauty Shot – The Advanced Collagen & Micronutrient Matrix

The Biological Evolution of Dermal Tissue Integrity

The integrity, elasticity, and hydration of the cutaneous matrix directly depend on the density of structural proteins and robust protection against oxidative stress. Throughout the biological aging process, accelerated by exogenous factors such as UV radiation and environmental stressors, the endogenous synthesis of core structural components steadily declines. Because evolution designed the dermal barrier primarily as a protective shield and secondarily as a nutrient recipient, targeted internal supply is essential to sustain tissue density. Our Beauty Shot is engineered to deliver bioactive peptides and essential co-factors designed to functionally complement daily nutrition and support overall well-being.

The Technological Core Feature: Bioactive Peptide Matrix within an Antioxidant Fruit Base

Conventional collagen-based products in powder or tablet form often feature high molecular weights, which can result in incomplete breakdown and poor absorption within the digestive tract. The technological advancement of the Beauty Shot relies on highly hydrolyzed bovine collagen (Peptiplus®) featuring an optimized peptide architecture. Suspended within a nutrient-dense liquid matrix of apple, raspberry, orange, lemon, and blackcurrant juices, these bioactive peptides are fully dissolved. This advanced fluid deployment provides excellent nutrient availability within the digestive system, allowing the vital components to complement the daily diet effectively and support your beauty routine smoothly without traditional digestive delays.

The Holo-Synergistic Saberry® & Micronutrient Framework

The biochemical dynamics of this formulation result from the targeted integration of structural proteins with a synergistic antioxidant defense network. The system combines Peptiplus® collagen peptides with Saberry® (a patented Amla fruit extract), black carrot concentrate, and the essential trace elements zinc (as zinc citrate), selenium, and chromium. While vitamin C initiates the enzymatic hydroxylation required to contribute to normal collagen formation, zinc and selenium act as fundamental co-factors for the maintenance of normal hair and nails. This synergistic loop helps protect cells from oxidative stress, establishing a high-quality nutritional network that supports the natural maintenance of connective tissues.

Scientifically Validated Support for Tissue Structure & Cellular Protection

Our liquid beauty formulation delivers a comprehensive spectrum of officially approved, scientifically validated health benefits (EFSA claims) to optimize cellular physiology:

- **Collagen Synthesis & Skin Function:** Vitamin C provenly contributes to normal collagen formation for the normal functioning of the skin.
- **Maintenance of Skin, Hair & Nails:** Zinc contributes to the maintenance of normal skin, normal hair, and normal nails; selenium provides a scientifically confirmed contribution to the maintenance of normal hair and normal nails.
- **Antioxidant Cellular Shield:** Vitamin C, zinc, and selenium contribute to protecting cells from oxidative stress.
- **Cell Division & Protein Synthesis:** Zinc has a function in the process of cell division and contributes to normal protein synthesis.
- **Macronutrient Metabolism:** Chromium contributes to normal macronutrient metabolism and contributes to the maintenance of normal blood glucose levels.

FloraSan

Energy Shot

ENERGY SHOT LIQUID NUTRACEUTICALS

Ingredients: Ginger juice 21,5 g, apple juice concentrate 15,7 g, fresh-squeezed lemon juice 7,3 g, water, guarana extract 1.900 mg, ashwagandha extract 600 mg, niacin (nicotinamide) 2,40 mg, vitamin B6 (pyridoxine hydrochloride) 0.21 mg

nutritional values	daily portion	NRV%*
Guarana extract	800 mg	--
Ashwagandha extract	250 mg	--
Niacin (nicotinamide)	2,4 mg	15
Vitamin B6 (pyridoxine hydrochloride)	0,21 mg	15

NRV: Reference value according to the EU Food Information Regulation

Content: e 100ml

Energy Shot – The Advanced Botanical & B-Vitamin Matrix

The Biological Evolution of Acute Energy Mobilization

The capacity to support cognitive focus and daily performance during phases of intense physical or mental demand has historically been a critical lifestyle factor. In modern daily life, prolonged performance pressure combined with nutritional deficits frequently triggers tiredness and energy deficits. Artificial stimulants often overload the nervous system temporarily, leaving behind a profound state of exhaustion. Our Energy Shot is engineered to deliver a physiologically balanced solution designed to functionally complement daily nutrition, support the natural energy-yielding metabolism, and help maintain everyday vitality.

The Technological Core Feature: Bioactive Direct Juice Matrix for Sustained Release

Conventional energy beverages typically rely on isolated, synthetic caffeine combined with high sugar contents, which triggers a rapid spike in heart rate followed by an abrupt performance crash. The technological advancement of our Energy Shot utilizes a bioactive liquid matrix composed of ginger juice, apple juice concentrate, and fresh-squeezed lemon juice. Suspended within this nutrient-dense medium is a high-potency guarana extract. The plant-based caffeine within this extract is naturally bound to tannins. This molecular bond ensures that the caffeine is broken down gradually within the gastrointestinal tract, providing an excellent and well-tolerated alternative that allows the nutritional components to complement the daily diet effectively for a prolonged, steady support of your daily routine.

The Holo-Synergistic Adaptogen & Neuro Framework

The biochemical efficiency of this formulation results from the targeted molecular integration of natural stimulation with adaptogenic botanicals. The system combines stimulating guarana extract with premium ashwagandha extract and the neuro-metabolic co-factors Niacin (Vitamin B3) and Vitamin B6. While guarana is traditionally valued for supporting vitality and focus, ashwagandha acts as an adaptogen to complement the diet during demanding periods. Vitamin B3 and Vitamin B6 complete this vital matrix, contributing to the normal functioning of the nervous system. This synergistic loop reliably delivers essential co-factors to support the natural energy-yielding metabolism holistically.

Scientifically Validated Support for Energy Metabolism & Nervous System Function

Our liquid focus formulation delivers a comprehensive spectrum of officially approved, scientifically validated health benefits (EFSA claims) to optimize human physiology:

- **Cellular Energy Yield:** Niacin (Vitamin B3) and Vitamin B6 contribute to a normal energy-yielding metabolism.
- **Reduction of Tiredness & Fatigue:** Vitamin B3 and Vitamin B6 provide a scientifically confirmed contribution to the reduction of tiredness and fatigue.
- **Nervous System Operation:** Both niacin and vitamin B6 support the normal functioning of the nervous system.
- **Psychological Function Support:** Vitamin B3 and Vitamin B6 contribute to normal psychological function.
- **Protein Metabolism Regulation:** Vitamin B6 contributes to normal protein and glycogen metabolism and contributes to the normal regulation of hormonal activity.

FloraSan

ANTI AGING SHOT

ANTI AGING SHOT LIQUID NUTRACEUTICALS

Ingredients:

Mango juice: 6,500.00 mg, concentrated apple juice: 1,000.00 mg, low molecular weight hyaluronic acid (Sodium Hyaluronate 5–10 kDa): 100.00 mg, hyaluronic acid (500–700 kDa): 100.00 mg, vitamin C (L-ascorbic acid): 160.00 mg, vitamin B3 (niacinamide): 32.00 mg, vitamin E (DL-alpha-tocopheryl acetate): 12.00 mg, biotin: 1,000.00 µg glycosides (sweeteners): 6.00 mg, natural mango flavor: 4.30 mg, natural passion fruit flavor: 6.60 mg

nutritional values	30 ml	NRV%*
low molecular weight hyaluronic acid	100 mg	--
hyaluronic acid	100 mg	--
vitamin C (L-ascorbic acid)	160 mg	200
vitamin B3 (niacinamide)	32 mg	200
vitamin E (DL-alpha-tocopheryl acetate)	12 mg	100
biotin	1000 µg	2000

NRV: Reference value according to the EU Food Information Regulation

Content: e 30ml

Anti Aging Shot The Advanced Hyaluronic & Micronutrient Matrix

The Biological Evolution of Cellular Tissue Regeneration

Sustaining the extracellular matrix and fluid binding within tissues represents a fundamental biological challenge for the human organism. With advancing age, compounded by exogenous stressors such as UV radiation, the endogenous production of structural components like hyaluronic acid declines. Because evolution designed the dermal barrier primarily as a protective shield and secondarily as a nutrient recipient, peripheral tissue structures require a targeted nutritive supply during phases of elevated stress. Our formulation is engineered to deliver essential matrix building blocks and high-potency antioxidant co-factors designed to functionally complement daily nutrition and support overall vitality.

The Technological Core Feature: Dual Hyaluronic Acid Matrix with Multi-Stage Absorption Profile

Conventional hyaluronic acid preparations frequently utilize a single molecular weight, which can limit their functional integration within the organism. The technological advancement of our formulation relies on its liquid dual matrix, suspended in a premium base of mango juice and apple juice concentrate. The formulation combines low molecular weight hyaluronic acid (Sodium Hyaluronate 5–10 kDa) with high molecular weight hyaluronic acid (500–700 kDa). This advanced fluid deployment provides excellent nutrient availability within the digestive system, allowing the vital components to complement the daily diet effectively and support your daily wellness routine smoothly without traditional digestive delays.

The Holo-Synergistic Antioxidant & Biotin Framework

The biochemical dynamics of this formulation result from a synergistic loop combining deep hydration with targeted nutritional cell protection. The system integrates the dual hyaluronic acid matrix with a high-potency micronutrient complex consisting of vitamin C, vitamin E, vitamin B3 (niacin), and pure biotin. While vitamin C contributes to normal collagen formation, vitamin E acts to contribute to the protection of cells from oxidative stress. Concurrently, niacin and biotin sustain cellular homeostasis and nutritionally support the maintenance of normal skin.

Scientifically Validated Support for Tissue Structure & Antioxidant Cellular Shielding

Our concentrated liquid formulation delivers a comprehensive spectrum of officially approved, scientifically validated health benefits (EFSA claims) to optimize tissue physiology:

- **Maintenance of Skin & Mucous Membranes:** Biotin and vitamin B3 (niacin) contribute to the maintenance of normal skin and the maintenance of normal mucous membranes.
- **Collagen Synthesis for Skin Function:** Vitamin C provides a scientifically confirmed contribution to normal collagen formation for the normal functioning of the skin.
- **Oxidative Stress Protection:** Vitamin C and vitamin E contribute to the protection of cells from oxidative stress.
- **Cellular Energy Metabolism:** Vitamin C, vitamin B3 (niacin), and biotin contribute to a normal energy-yielding metabolism.
- **Fatigue & Tiredness Reduction:** Vitamin C and vitamin B3 (niacin) contribute to the reduction of tiredness and fatigue.

Collagen 12.000

COLLAGEN 12.000 LIQUID NUTRACEUTICALS

Ingredients:

Hydrolyzed bovine collagen (Peptiplus® XB), concentrated apple juice, purified water, Vitamin C (L-ascorbic acid), zinc gluconate, hyaluronic acid, grape seed extract (Vitis vinifera, 95% OPC), Saberry® (Amla fruit extract), Vitamin B3 (nicotinamide), Vitamin E (DL-alpha-tocopheryl acetate), Vitamin A (retinyl acetate), biotin, sodium selenite, chromium chloride, acidifier: citric acid; sweeteners: steviol glycosides; flavor.

nutritional values	30 ml	NRV%*
Hydrolyzed bovine collagen (Peptiplus®)	12,000 mg	--
Grape seed extract (Vitis vinifera, 95% OPC)	20 mg	--
Saberry® (Amla fruit extract)	200 mg	—
Vitamin C	80 mg	100
Zinc (zinc citrate)	1,5 mg	15
Selenium	8,25 µg	15
Chromium	6 µg	15

NRV: Reference value according to the EU Food Information Regulation

Content:  30ml

Collagen 12.000 The Advanced Collagen & Micronutrient Complex

The Biological Evolution of Deep Connective Tissue Density

Stabilizing cutaneous layers, tendinous structures, and the extracellular matrix demands a continuous supply of specific amino acid sequences. With advancing age, compounded by physical or oxidative stress, the endogenous collagen framework degrades noticeably, weakening the structural integrity of the tissue. Because biological evolution has linked the regeneration of fibrous proteins to the availability of synergistic co-factors, a high-potency external supply is essential to support the body's natural maintenance systems. Our Collagen 12.000 is engineered to provide an intensive structural foundation designed to functionally complement daily nutrition and support overall vitality.

The Technological Core Feature: High-Concentration Peptide Density within a Cutaneous Transport Matrix

Conventional collagen preparations are frequently underdosed or exhibit an inadequate molecular weight to efficiently pass the intestinal barrier. The technological advancement of Collagen 12.000 lies in delivering 12.000 mg of hydrolyzed bovine collagen (Peptiplus® XB) per 30 ml portion. Dissolved within a bioactive matrix of apple juice concentrate, this extreme peptide density is complemented by hyaluronic acid (500–700 kDa). This advanced fluid deployment provides excellent nutrient availability within the digestive system, allowing the vital components to complement the daily diet effectively and support your daily routine smoothly without traditional digestive delays.

The Holo-Synergistic OPC & Micronutrient Defense System

The deep biological efficacy of this formulation results from the targeted molecular integration of structural proteins with a high-potency nutritional shield. The system combines the Peptiplus® collagen peptides and hyaluronic acid with grape seed extract (Vitis vinifera, standardized to 95% OPC) and a comprehensive micronutrient complex (vitamin A as retinyl acetate, vitamin C, vitamin E, vitamin B3 as niacinamide, zinc gluconate, and pure biotin). While vitamin C initiates the enzymatic hydroxylation required to contribute to normal collagen formation, the high-dose OPC and botanical extracts support the stability of the fluid matrix. This synergistic loop delivers vital nutrients to help protect cells from oxidative stress and support the natural maintenance of the tissue matrix.

Scientifically Validated Support for Tissue Structure & Cellular Synthesis

Our highly concentrated liquid formulation delivers a comprehensive spectrum of officially approved, scientifically validated health benefits (EFSA claims) to optimize human physiology:

- **Collagen Synthesis & Skin Function:** Vitamin C contributes to normal collagen formation for the normal functioning of the skin.
- **Maintenance of Skin, Hair & Mucous Membranes:** Vitamin A, vitamin B3 (niacin), zinc, and biotin contribute to the maintenance of normal skin and the maintenance of normal mucous membranes, while biotin and zinc support the maintenance of normal hair.
- **Antioxidant Cellular Protection:** Vitamin C and vitamin E contribute to the protection of cells from oxidative stress.
- **Cell Division & Protein Synthesis:** Zinc has a function in the process of cell division and contributes to normal protein synthesis.
- **Immune System Support:** Vitamins A and C, alongside zinc, contribute to the normal function of the immune system.

Move & Shot

MOVE & SHOT LIQUID NUTRACEUTICALS

Ingredients:

Hydrolyzed bovine collagen (Peptiplus®) 10,000.00 mg, concentrated apple juice 8,960.00 mg, MSM (methylsulfonylmethane) 800.00 mg, glucosamine sulfate 425.00 mg, chondroitin sulfate 250.00 mg, citric acid 1,575.00 mg, vitamin C 150.00 mg, vitamin E (DL-alpha-tocopheryl acetate) 10.00 mg, devil's claw extract (Harpagophytum procumbens) 5.00 mg, Baikal skullcap extract (Scutellaria baicalensis) 5.00 mg, vitamin K 25.00 µg, vitamin D 10.00 µg, vitamin B12 5.00 µg, peach flavor 103.00 mg, steviol glycosides (sweetener) 6.00 mg

nutritional values	30 ml	NRV%*
Hydrolyzed bovine collagen (Peptiplus®)	10.000 mg	--
MSM (methylsulfonylmethane)	800 mg	--
glucosamine sulfate	425 mg	--
chondroitin sulfate	250 mg	--
vitamin C	150 mg	188
vitamin E	12 mg	83
devil's claw extract	5 mg	--
Baikal skullcap extract	5 mg	--
vitamin K	25 µg	33
Vitamin D	10 µg	200
Vitamin B12	5 µg	200

NRV: Reference value according to the EU Food Information Regulation

Content: e 30ml

Move & Shot – The Advanced Bone & Cartilage Formula

The Biological Evolution of Musculoskeletal Integrity

Sustaining mobility, cartilage density, and the load-bearing capacity of the musculoskeletal system represents a fundamental physiological prerequisite for an active lifestyle. Continuous mechanical strain, athletic exertion, or biological aging processes lead to steady wear and tear of the extracellular cartilage matrix and joint structures. Because evolution linked the regeneration of these avascular tissues to the constant availability of highly specific amino acids and endogenous structural blocks, a precise nutritive supply is critical. Our Move & Shot is engineered to deliver a high-potency structural foundation designed to functionally complement daily nutrition and support overall physical well-being.

The Technological Core Feature: Bioactive Peptide Density within a Viscosity-Optimized Matrix

Conventional joint preparations in powder or tablet form frequently utilize poorly soluble compounds that hit absorption bottlenecks within the gastrointestinal tract and suffer from delayed uptake. The technological advancement of Move & Shot lies in its liquid matrix based on apple juice concentrate, delivering 10.000 mg of hydrolyzed bovine collagen (Peptiplus®) in a molecularly optimized format. Combined with the key matrix components MSM (methylsulfonylmethane), glucosamine sulfate, and chondroitin sulfate, a highly fluid active environment is established. This advanced fluid deployment provides excellent nutrient availability within the digestive system, allowing the vital components to complement the daily diet effectively and support your active lifestyle smoothly without traditional digestive delays.

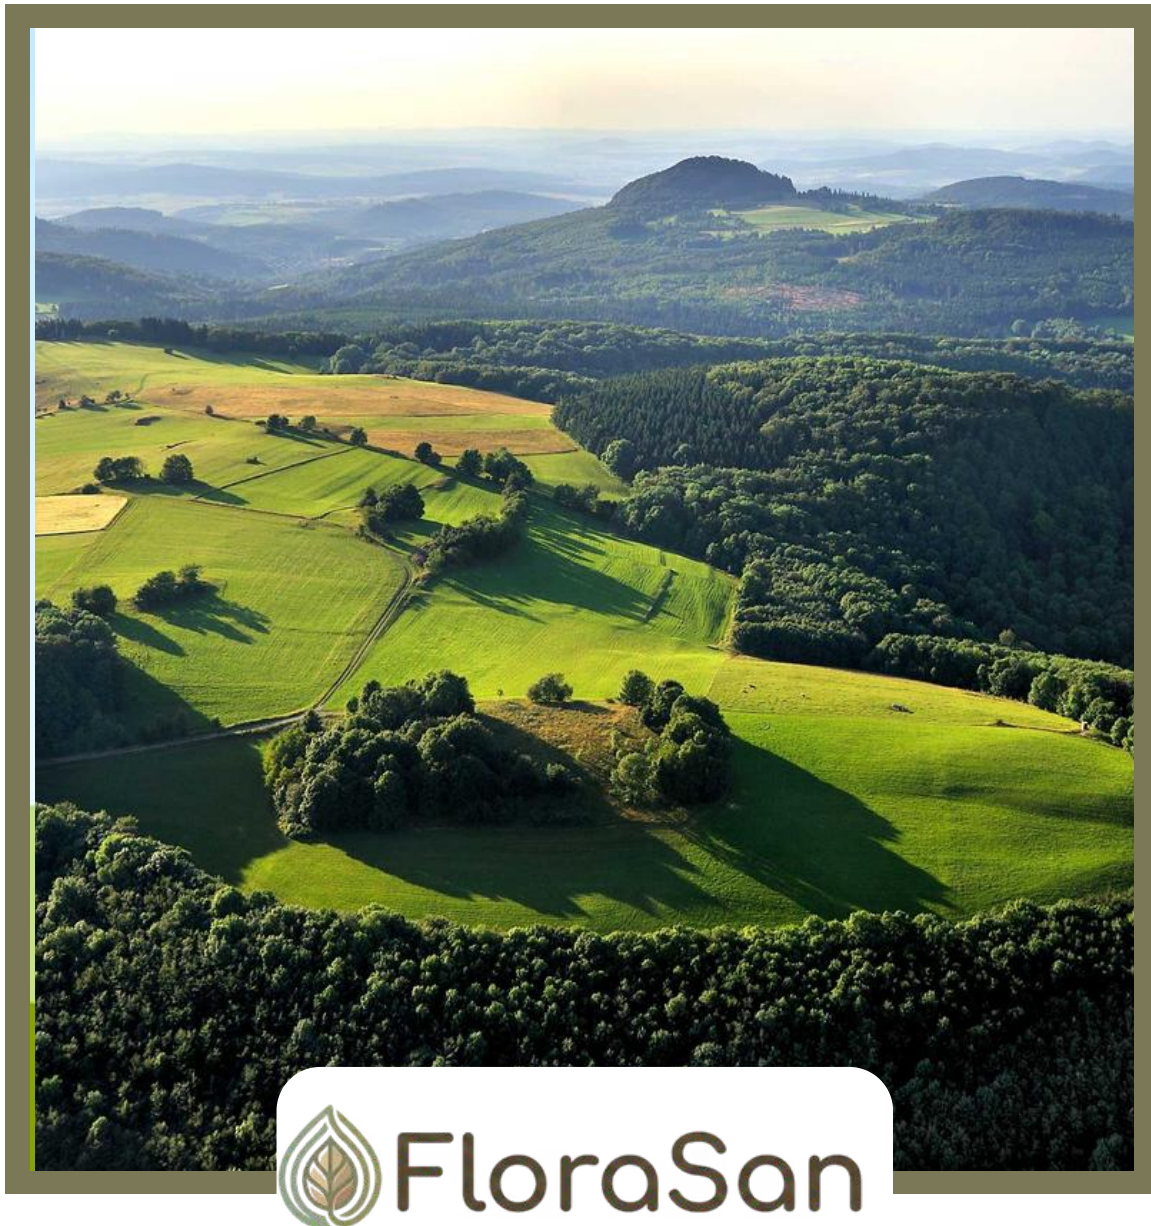

The Holo-Synergistic Botanicals & Micronutrient Framework

The biochemical efficiency of this formulation results from the targeted molecular integration of structural matrix blocks with a complementary botanical and inorganic defense system. The system integrates devil's claw extract and Baikal skullcap extract into a high-potency micronutrient network composed of vitamins C, E, K, D, and B12. While vitamin C contributes to normal collagen formation for the normal function of cartilage, vitamin D contributes to the maintenance of normal bones and normal muscle function. The synergistic interplay of the botanicals with the organic sulfur source (MSM) and the vitamins delivers essential nutrients to help protect cells from oxidative stress and reliably support the body's natural tissue maintenance.

Scientifically Validated Support for Cartilage, Bones & Tissue Integrity

Our liquid joint formulation delivers a comprehensive spectrum of officially approved, scientifically validated health benefits (EFSA claims) to optimize the musculoskeletal system:

- **Collagen Synthesis & Cartilage Function:** Vitamin C contributes to normal collagen formation for the normal function of cartilage and the normal function of bones.
- **Bone Structure Maintenance:** Vitamin D and vitamin K contribute to the maintenance of normal bones; vitamin D further contributes to normal absorption and utilization of calcium and phosphorus as well as the maintenance of normal blood calcium levels.
- **Muscle Function Support:** Vitamin D contributes to the maintenance of normal muscle function.
- **Antioxidant Cellular Protection:** Vitamin C and vitamin E contribute to the protection of cells from oxidative stress.
- **Cell Division & Energy Metabolism:** Vitamin B12 and vitamin D have a role in the process of cell division; vitamin B12 and vitamin C contribute to a normal energy-yielding metabolism and the reduction of tiredness and fatigue.

Our headquarters, nestled in the heart of the untouched nature of the Rhön Biosphere Reserve, reflects our deep dedication to uncompromised quality and purity. Inspired by this protected, powerful landscape, we carefully select only the finest, purest raw materials from around the world to ensure the absolute integrity of our products. Trust in our German-made supplements, where global premium ingredients are crafted with the utmost precision and scientific care of German manufacturing.

CEO . Markus Bauer
